Introduction

The Event Ticket extension for Magento 2 by Magenest is the ultimate extension for E-commerce websites that allows merchants to create and manage events and tickets. Merchants can create multiple custom ticket options such as VIP, adults, children,... each with a customized template to best fit the event's context. The extension can also send reminder emails so that your customer won't miss the event.

Features

For admin

- Create product as the event ticket type
- Support multiple locations, multiple dates, and multiple sessions/timeslot for the event.
- Add event to the menu bar
- Specify custom ticket type for each event (ticket options) and set name, price, quantity, and sequence of available tickets for each type
- Automatically generate Bar code and QR code
- Drag-drop pdf template design with XY coordinates in the admin panel
- Preview and print the PDF ticket instantly in the admin panel
- Add Google map to event details
- Create unlimited email templates
- Assign an email template to each event
- Allow customers to fill in attendee information at the checkout page
- Easily track attendees, purchased tickets for each event
- Add terms and conditions for each event
- Send ticket confirmation emails to event attendees
- Send pdf tickets to all the attendees or the purchaser only
- Export event attendees, event list, and ticket list into CSV, XML files

For customers

- Choose from multiple ticket options (location, date, time, and ticket type)
- View the location of each event with a pinpoint on Google map integrated on product page

System Requirements

Your store should be running on

- **Magento Open Source 2.2.x, 2.3.x, 2.4**
 - **Magento Commerce 2.2.x,2.3.x, 2.4**
-

Configurations

On the Admin sidebar, go to **Stores > Configuration > Magenest > Event Ticket**.

Configuration 🔍 99+ 👤 magenest

Event name [store view]

+ General:

- **Pattern to generate code:** The ticket code format. [A2] is to generate 2 random characters, [N4] is to generate 4 random numbers while "Magenest" is the hard code
- **Change quantity:** You can choose to deduct the ticket stock after the order is placed or is invoiced
- **Date format:** You can choose from 16 available date formats for the event
- **Auto-hide expired dates:** Select **Yes** to hide the expired date from the calendar
- **Display Google Maps for events:** Choose Yes to display Google map for each event location
- **Google Map API Keys:** Fill in your Google API Keys to integrate Google map. [Learn more](#)

+ Ticket

- **When ordered quantity X > 1:** When the customer purchase more than 1 ticket, you can choose to whether **1 ticket** or **more than 1 ticket** will be generated. All of the tickets will be sent to the customer's email address.
⚠️ **Note** that if multiple tickets are generated, there will be multiple emails sent to the purchaser.

+ Email:

- **Send reminder email before event starts:** Choose **Yes** to send reminder email of the events to customers
- **Days to remind before event starts:** Enter the number days before the event in order to send reminder emails
- **Reminder Email Templates:** Assign the email template to send a reminder email. You can create an email template in **Marketing > Email Templates**
[blocked URL](#)

Below is the default email template:

Email Template

```
1  {{template config_path="design/email/header_template"}}
2
3  <p>{{trans "This is your reminder from %store_name." store_name=$store.getFrontendName()}}</p>
4  <p>{{trans "Your event starts in the next"}} {{var remind_day}} {{trans "days"}} </p>
5  <ul>
6      <li><strong>{{trans "Event: "}}</strong> <em> {{var title}}</em></li>
7      <li><strong>{{trans "Customer Name: "}}</strong> {{var customer_name}}</li>

Edit Event Tickets

+ Tickets Setup

The ticket is a product on your site, so to set it up as an event ticket, please scroll down to see **Event Ticket**.

You can enable the **Apply the locations/schedules to all the ticket options**.

- **Locations/Schedules:** You can add multiple locations, with multiple dates and sessions/timeslot. You can set the limited quantity for each session.
Note that the total of limited quantities must be equal or less than the product quantity.
- The active field will be checked by default, if this box is left unchecked, the session will not display on the Event Detail Page.

Event Tickets

⌵ Tickets Setup

Apply Locations/Schedules to all Tickets Options Yes

⌵ Locations/Schedules

Add New Location

< 1 of 1 >

Location Title	Start Date	End Date	Active	Actions
<input type="text" value="Stadium A"/>	<input type="text" value="10/9/2020"/>	<input type="text" value="10/29/2020"/>	<input checked="" type="checkbox"/>	Add New Date Remove

Add New Session

< 1 of 1 >

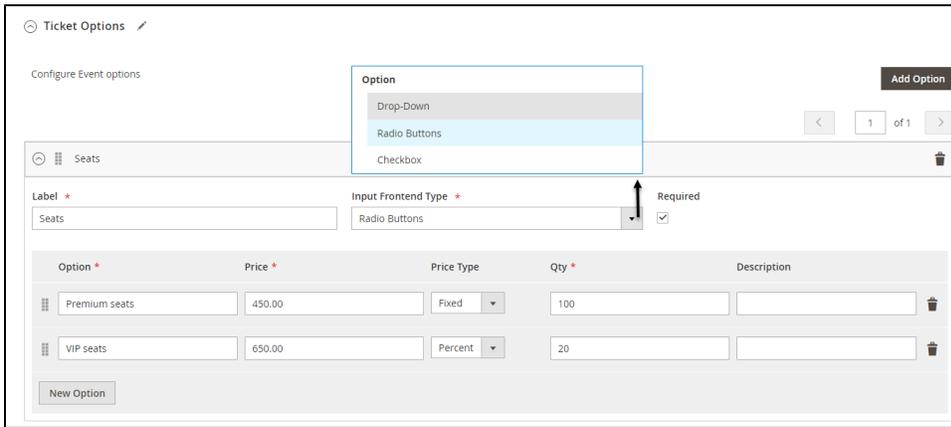

Start Time	End Time	Qty	Limit Qty	Active	Actions
<input type="text" value="09:00"/>	<input type="text" value="21:00"/>	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Remove

hh:mm (24h) hh:mm (24h)

+ Ticket options:

You can add unlimited ticket options with its own price, quantity and description.

- **Price:** The price modifier is added to the product base price. There are two price type (fixed and percent).
For example: Product base price is \$100
Fixed price: The option for VIP seat costs \$50, then the total price for the ticket will be \$150.
Percent: The option for VIP seat costs 10% more from the product price. The total price for the ticket will be \$110.
- **Input front type:** You can choose to display the ticket options from 3 types (Drop-down, radio buttons, checkbox).

Template Settings:

PDF Template

You can create any manage PDF Template in **Catalog > PDF Template**
