## Introduction to Magento Game License Delivery extension

Game license delivery by Magenest is a powerful tool that allows Magento store admins to sell PIN code, software activation code, license key,... with great convenience. Codes can be added easily, and store admins will be able to manage available PIN products, orders, codes and invoice the customer to complete the delivery. Meanwhile, the extension will deliver the codes directly to the customers after purchase via email.

## Features

The extension will be shipped with the following features

1. A product can be packed with PIN codes easily
2. PIN codes come in 3 types: text code, file code; codes quantity per product is basically unlimited.
3. Admin can upload multiple text codes or file codes by using zip file upload.
4. Admin can deliver codes by invoicing the customer, no sweat.
5. Admin can add an Invoice ID within a set of codes. With this feature, admin can easily categorize which order goes with which set of codes.

## System Requirements

Your store should be running on Magento Community Edition version 1.8.x or 1.9.x.

## Perform the Installation

- After purchasing and download the module's zip file, unzip it into a directory of your choice.
- We recommend using FileZilla to perform the installation via FTP. Enter your store's Host IP, Username and Password, then hit **Quickconnect**

Host: 198.57.175.36 Username: magentode Password: Password Port: Quickconnect

Response: 227 Entering Passive Mode (198,57,175,36,140,109)  
Command: MLSD  
Response: 150 Accepted data connection  
Response: 226-Options: -a -l  
Response: 226 3 matches total  
Status: Directory listing successful

- Carefully upload the files of the module to the corresponding directory

## Post-installation

- You should refresh Magento's cache to provide Magento with the ability to register a new extension.
- To prevent an "Access Denied" error, you have to re-enter to the backend. Log in with a full administrator account to get the new permissions.

- Now you should check whether your website and your new module works as expected.

## Managing PIN products

### Creating a PIN product and upload codes

- Navigate to **CatalogManage Products** to see available products. If you want to create a new product, Click on **Add Product**, the product should be of type virtual.

The screenshot shows the 'Manage Products' page. At the top, there are navigation tabs: Dashboard, Sales, **Catalog**, Customers, Promotions, Newsletter, CMS, Reports, System, Pin management. Below the navigation, there are several messages: 'Latest Message: Remind...', 'One or more of the Index...', and 'You have 9 critical, 6 major, 19 minor and 101 notice unread message(s)'. The main content area is titled 'Manage Products' and includes a search bar, 'Add Product' button, and a table of products. The table has the following columns: ID, Type, Attrib. Set Name, SKU, Price, Qty, Visibility, Status, and Action. The table contains three rows of product data.

ID	Type	Attrib. Set Name	SKU	Price	Qty	Visibility	Status	Action
23	Virtual Product	Default	ma1723	\$20.00	3	Catalog, Search	Enabled	Edit
22	Virtual Product	Default	Viettel	\$123.00	1254253	Catalog, Search	Enabled	Edit
21	Virtual Product	Default	game_developer_conference_2015	\$1,678.00	9985	Catalog, Search	Enabled	Edit

- When you have a product ready, go to its detail page and find the Tab **Game license delivery**

The screenshot shows a vertical list of tabs on a product detail page. The tabs are: Cross-sells, Product Reviews, Product Tags, Customers Tagged Product, Custom Options, **Game license delivery** (highlighted), and Event Booking.

- To add a new set of codes, click on **Add PIN** for a text or image code, **Add PIN using zip file** for zip file upload. Keep in mind that with **Add PIN using zip file**, you can upload multiple text files or image files

SUBTOTAL \$20.00

**GRAND TOTAL \$20.00**

[EMPTY CART](#) [UPDATE SHOPPING CART](#) -OR- [CONTINUE SHOPPING](#) [PROCEED TO CHECKOUT](#)

- The customer can choose the quantity. This is also he number of codes that will be delivered. However, the quantity also depends on the actual product quantity defined in Magento Backend, so the admin needs to make sure that the actual product quantity in Magento is always larger than the quantity of PINs available.
- If you go to **Pin Management Manage PIN Order**, you should see an order has been placed, with **pending** status and **Not completed** delivery status

<input type="checkbox"/>	100000080	pending	Viettel	Viettel	1	0	Not complete	<a href="#">Detail</a>	<a href="#">Delivery PIN</a>
