

# 1. Couture Fashion Installation Guides

Here we will guide you through the installation process of our extension. First off, open FileZilla, log in to your host as follows:

In the above example we switched the local site to the module directory, and the remote site to the code directory. Now on the remote site window, inside app/code directory, create a folder named **Magenest** and go inside it. Now on your local site window, right click on Couture Fashion theme and click **Upload**. The extension will be uploaded onto your host in a few minutes.

Now, using your Command line/Terminal, log into your ssh server, go to your **Magento root directory**, say it's named **magento2**, and execute the following commands:

```
cd ..  
sudo chmod -R 777 magento2  
cd magento2  
php bin/magento setup:upgrade  
sudo chmod -R 777 var pub
```

After running all these, your Command line/Terminal window might look like this:

```
Module 'Magento_BundleSampleData':  
Module 'Magento_Rss':  
Module 'Magento_DownloadableSampleData':  
Module 'Magento_Captcha':  
Module 'Magento_OfflineShippingSampleData':  
Module 'Magento_ConfigurableSampleData':  
Module 'Magento_SalesSampleData':  
Module 'Magento_ThemeSampleData':  
Module 'Magento_ProductLinksSampleData':  
Module 'Magento_ReviewSampleData':  
Module 'Magento_SendFriend':  
Module 'Magento_Ui':  
Module 'Magento_Sitemap':  
Module 'Magento_Authorizenet':  
Module 'Magento_Swagger':  
Module 'Magento_Swatches':  
Module 'Magento_SwatchesSampleData':  
Module 'Magento_CatalogRuleSampleData':  
Module 'Magento_TaxImportExport':  
Module 'Magento_TaxSampleData':  
Module 'Magento_CatalogRuleConfigurable':  
Module 'Magento_CmsSampleData':  
Module 'Magento_Translation':  
Module 'Magento-Shipping':  
Module 'Magento-Ups':  
Module 'Magento-UrlRewrite':  
Module 'Magento-GroupedProductSampleData':  
Module 'Magento-Usp':  
Module 'Magento-Variable':  
Module 'Magento-Version':  
Module 'Magento-Webapi':  
Module 'Magento-SalesRuleSampleData':  
Module 'Magento-CatalogWidget':  
Module 'Magento-WidgetSampleData':  
Module 'Magento-Wishlist':  
Module 'Magento-WishlistSampleData':  
Please re-run Magento compile command  
[root@centos-2gb-sgp1-01 magento2]# sudo chmod -R 777 var pub  
[root@centos-2gb-sgp1-01 magento2]#
```

Afterwards, go to your backend site, go to **System > Cache Management** and flush all caches
