Introduction

Magento 2 Stripe Payment Gateway And Subscription extension by Magenest is the ultimate tool that provides a seamless payment experience between your Magento 2 store and the Stripe Payment Gateway.

stripe

Payment + Subscription

Features For Admins

- A lot of features is included in the extension that you can tweak to make it best suit your business, including:
 - SCA is available on Stripe Checkout and Stripe Payment Intents
 - SEPA Direct Debit
 - Choose between Authorize Only or Authorize and Capture.
 - IFrame Checkout Form
 - Alipay, Giropay, Apple Pay, Google Pay
 - 3D Secure
 - Various credit card types
 - Enable CVC/AVS Verification
 - Access to more than 25 countries
 - Restrict unwanted countries from payment
 - Support Save Card function
 - Easily partial capture invoice.
 - Conveniently partial or total refund.
 - Support 135 currencies
 - Support MOTO (Making a payment from backend)
 - Support Giropay, Alipay, SOFORT, Bancontact, EPS, etc.

Features For Customers

- The primary aim of the extension is to deliver the most fluent and effortless payment experience to the customers:
 - Easily checkout using a credit card.
 - Manage subscriptions
 - Sign up for an account to save credit card information for future purchase
 - Flexible payment choices
 - Update Stripe Intents 2.0 (New)

System Requirements

Your store should be running on Magento 2 version **2.2.x, 2.3.x, 2.4**

Compatibility: Magento 2.3.5 and above, 2.4.x (Open Source, Commerce)

- Add Magento 2.4.6 support
 - Update branding
 - Bug fixes
-

Configuration

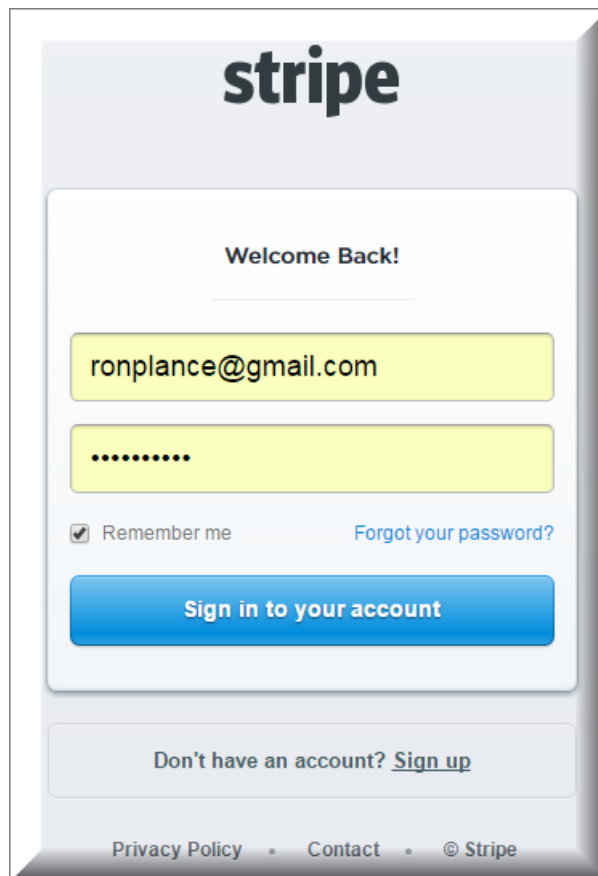

Set Up Stripe Online Account

The merchant needs to have a Stripe account to use our extension. If you have not any Stripe accounts, you need to create a new account by clicking on the following link: <https://dashboard.stripe.com/register>.

Then, choose **Create your Stripe account** to set up a new account:

The image shows the Stripe account creation interface. At the top, the Stripe logo is centered. Below it, a white card contains the heading "Create your Stripe account." and a link "...or save your account later, and skip this step >". The card features three input fields for "Email", "Password", and "Confirm password", followed by a blue "Create your Stripe account" button. Below the card, there is a link "Already have an account? Sign in". At the bottom of the page, a footer contains links for "Forgot your password?", "Privacy Policy", "Contact", and "© Stripe".

Once you have the Stripe account, sign in to your account.

After that, click on **API** at the left corner > **API Keys** to take API Keys.

A screenshot of the Stripe dashboard's API Keys section. The left sidebar shows the "API" menu item highlighted with a red box. The main content area shows the "API Keys" section. A table lists the API keys, with the "Publishable key" and "Secret key" rows highlighted by a red box. The table has columns for NAME, TOKEN, LAST USED, and CREATED. The "Publishable key" row shows the token "pk_test_T65TRTXW4WLuI5BVCEmtBLGy" and the "Secret key" row shows the token "sk_test_X1r2BPxzLCHjqwpzINqohr81".

NAME	TOKEN	LAST USED	CREATED
Publishable key	pk_test_T65TRTXW4WLuI5BVCEmtBLGy	Aug 7, 2017	Aug 2, 2017
Secret key	sk_test_X1r2BPxzLCHjqwpzINqohr81	Aug 7, 2017	Aug 2, 2017

Set Up The Integration On Magento 2

At the back end, you need to configure some fields to connect between your Magento site and the stripe account.

First, click on **Stripe Payments > Settings > Stripe Payment Gateway**

Requirement Settings

- **Sandbox Mode Enabled:** Turn this on (Yes) for test mode, remember to use the test key and test cards for testing. Other please turn this off (No) when you go Live.
- **Test/Live Publishable Key:**

[store view]

+ If you use the Test Key:

- You should fill in Stripe API Test Keys in **Test Publishable Key**, **Test Secret Key** to connect Magento, and Stripe Payment Gateway.
- Turn on the **Sandbox Mode Enabled** by choosing Yes

+ If you use the Live Key:

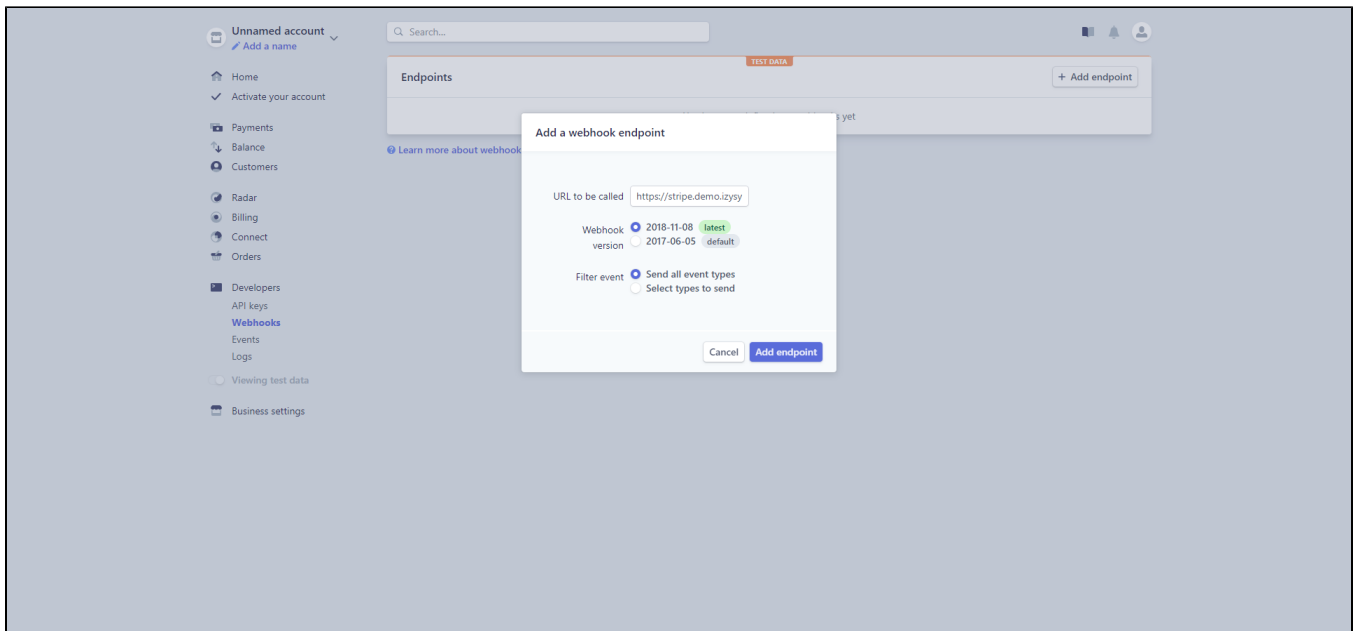

- Fill in your Stripe API Keys in **Live Publishable Key**, **Live Secret Key** to connect Magento with Stripe Payment Gateway.
- Turn off the **Sandbox Mode Enabled** by choosing No.

+ Webhooks config: You can configure Stripe webhooks by going to [Use webhooks to receive events from your account](#).

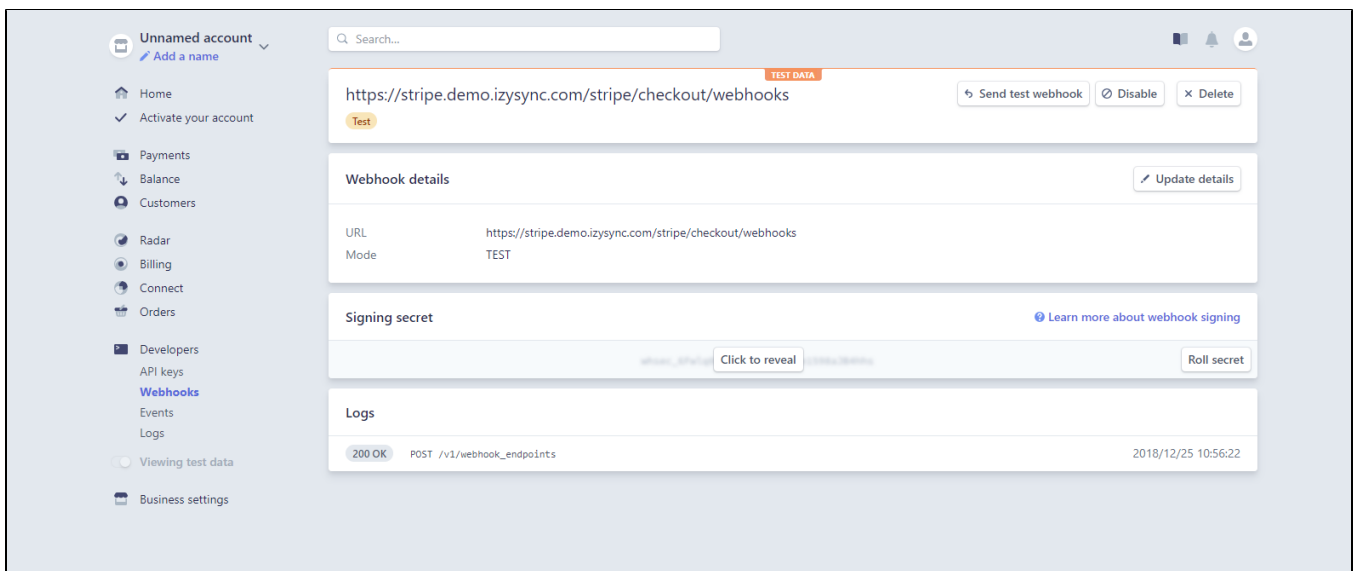

Login to your Stripe account, then in the Webhooks configuration, click on the **Add endpoint** button.

The URL to be called follows the format: **{your Magento url}/stripe/checkout/webhooks**

Select the filter event as **Send all event types**

Add a webhook endpoint

Copy the signing secret and paste it to Magento 2 Configuration

- **Webhooks signing secret:** Enter the signing secret from Stripe+
- **Email Customer:** Allow Stripe to send receipts to customers once the payment is made successfully.
- **Statement descriptor:** An arbitrary string to be displayed on your customer's statement. As an example, if your website is RunClub and the item you're charging for is a race ticket, you may want to specify a statement_descriptor of RunClub 5K race ticket. While many payment types will display this information, some may not display it at all.

Sort Order
[store view]

Enabled: Choose **Yes** to active **Stripe Payment Intents (SCA Ready)** on the storefront.

Title: enter the title for the payment method on the payment list on the checkout page.

Payment from Applicable Countries:

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the Payment from Specific Countries.

New Order Status: set the status for the new order on the Order page at the backend.

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

Sort Order: set the order of the payment on the payment method list.

Stripe Payment

Enabled: Choose Yes to enable the Stripe payment method.

Title: the title of the payment method displayed on the Checkout Page.

You can set the **Payment Action** to be Authorize and Capture or Authorize Only

- **Authorize Only (Authorization):** will check the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture(Sale):** will charge the debit/credit card at the time of the order submission.

Select Stripe API Integration: There are 3 Stripe API to choose

1. **Stripe.js v3 & Elements.** Pre-filled SAQ A
2. **Stripe.js v2.** SAQ A-EP
3. **Directly to the API.** SAQ D

It is highly recommended to use **Stripe.js v3 & Elements** for advanced security features.

Note: In order to enable 3D secure, you must use **Stripe.js v3 & Elements** or **Stripe.js v2**.

Display payment button: Enable this option to display Apple Pay, Google Pay, and Microsoft Pay payment button in the Stripe payment method

3D Secure: Choose Yes to enable 3D secure for Stripe payments

The behavior and application of 3D secure varies across card types and networks. Some card issuers do not support this verification method, in order to deal with that, you can choose 1 of 2 options for 3D secure application:

- **3D secure is recommended:** The process is not required, but you can be covered by liability shift.
- **3D secure is optional:** The process isn't required but can be performed to help reduce the likelihood of fraud.

Force 3D secure: Choose Yes to force 3D secure application.

Enable card saving: Allow logged in customers to save credit card information.

Enable MOTO: Allow admin to make a payment from the backend.

You can set the **New Order Status:** Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

Allowed Credit Card Types: You can choose which credit card types are accepted on your site by choosing one or more items.

Payment from Applicable Countries:

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries.**

In addition, you can add/edit the **Instructions** to instruct customers on how to do the payment.

Sort Order: The order of the payment method that will be displayed on the checkout page.

Subscription Configuration

Subscription Billing: You can choose to Send an Invoice to customers or Charge for the subscription automatically.

Apply tax for each subscription item

Cancel at period end

⚠ *Note that subscription product cannot be in the same cart with one-time purchase product*

Subscription products in the same cart have to be in the same billing cycle

Main Functions

For Subscription Product

- **Create a subscription product**

To create a subscription product, click on **Products > Catalog**. On the right side, click on **Add Product** and choose the desired product type among six types (Simple Product, Configurable Product, Grouped Product, Virtual Product, Bundle Product, Downloadable Product).

Then, the New Product page will be shown.

Regarding the Stripe Payment and Subscriptions extension, focus on two tabs named **Stripe Subscription** and **Stripe Subscription Billing Options**.

At the **Stripe Subscription** tab, you will set whether a product is a stripe subscription product or not.

- **YES:** This product will be shown as a stripe subscription product at the front end. This means this product plan in the **Stripe Subscription Billing Options** tab will be shown on the product detail page (e.g. Plan ID, Billing Frequency, etc).
- **NO:** This product will not be shown as a subscription product.

At the **Stripe Subscription Billing Options** tab, you will need to set plans for the subscription product. There are some fields to set, include:

- **Plan ID:** The ID of the plan
- **Period Unit:** Set subscription period in terms of the day, week, month, year
- **Billing Frequency:** How many times the customers want to repeat the subscription circle.

- **Trial Enabled:** Allow customers to try the product before deciding to subscribe or not. If you choose Yes, you can define the period time allowing customers to use the product for free. If you choose No, this means this product will not have a trial version.

Also, if you want to add more plans for a product, click on the **Add Option** button on the right side. Then, you can add the same as above.

Finally, click on the **Save** button to complete.

At the same time, your Stripe account will also automatically sync a product corresponding with the subscription product created at the **Plans** tab.

PLAN	COST
Black Crochet Lace Midi Skater Dress	\$400.00/day
Brown Rib Knit Open Keyhole Neck Popper Split Leg Jumpsuit	\$200.00 every 2 days
Bandeau Jumpsuit in Dusty Blue Knit	\$300.00/day

- **View And Manage Stripe Payment**

We created a Stripe Payment tab that allows you to view and manage Stripe Order.

There are two tabs, includes:

- **Settings**

With the Settings tab, we provide you with the fastest way possible to access Stripe Payment Settings.

- **Subscription Manager**

Go to the **Subscription Manager** tab, you will see the list of orders regarding the subscription products.

You can view and manage some information such as **Order ID, Subscription ID, Start Date, End Date, and Status** an easy way.

Stripe Apple Pay Checkout

The image shows the Magenest checkout page. At the top, the Magenest logo is on the left, and navigation links (SALE, TRAINING, WOMEN, STRIPE SUBSCRIPTIONS) and a search icon are on the right. Below the logo, the text says "Your order number is 000000515" with the number circled in red. Below that, it says "We'll email you an order confirmation with details and tracking info." and a "Continue Shopping" button. At the bottom, there is a "NEWSLETTER" section with the text "Sign Up for Our Newsletter:" and a form to "Enter your email address" with a "Subscribe" button.

After successful payment, at the **Payments** tab of Stripe, the order will be updated corresponding with Magento.

The image shows the Stripe Payments interface. On the left is a sidebar with "Unnamed Account" and various navigation links (Home, Activate your account, Payments, Payouts, Customers, Radar, Subscriptions, Connect, Products, API, Events & logs, Viewing test data, Business settings). The main area shows the "Payments" tab. At the top, it says "\$200.00 USD" with a "TEST DATA" button. Below that are buttons for "Refund...", "Refund as fraud...", and "+ Add note". A green checkmark indicates "Payment succeeded" on Aug 8, 12:13 AM. Below that, a blue shield icon indicates "Stripe risk evaluation: normal" on Aug 8, 12:13 AM. The "Payment details" section shows: ID: ch_1Ao8EvKcnQ2UUdbsU6uZNwud, Amount: \$200.00 USD, Fee: \$6.10, Date: 2017/08/07 17:13:37, and Description: No description. The "Metadata" section shows "No metadata" with an "Edit" button. The "Source details" section is partially visible at the bottom.

+ Checkout with Stripe Giro Pay

- Mark the checkbox **"My billing and shipping addresses are the same"** if the shipping address and the billing address are not different.
- If they are different, fill in the billing address then click "Update".

After filling in all the necessary information, click **Continue** to place the order.

Then, it redirects to **Stripe Giro Pay Payment Page** and the buyer can finalize his payment there.

+ Checkout with Stripe Alipay

- Mark the checkbox **"My billing and shipping addresses are the same"** if the shipping address and the billing address are not different.
- If they are different, fill in the billing address then click "Update".

After filling in all the necessary information, click **Place Order**

Then, it redirects to **Stripe Alipay Payment Page** and the buyer can finalize his payment there.

+ Checkout with Stripe Checkout (Direct Checkout)

- Mark the checkbox **"My billing and shipping addresses are the same"** if the shipping address and the billing address are not different.
- If they are different, fill in the billing address then click "Update".
- Fill in the credit card information

If the customer signs in with an account, he/she can use the save card function by ticking in the **Save your credit card** box.

After filling in all the necessary information, click **Place Order** to finalize the payment.

+ Checkout with Stripe IFrame Checkout (Redirect Checkout)

Another payment method is Stripe Checkout IFrame. It supports wonderful functions with Credit Card, Alipay, and **Bitcoin**.

When customers Place an order, an Iframe form will be displayed as below with 3 choices for payment methods.

The image shows a credit card IFRAME checkout form for a 'Demo Site'. At the top, there is a circular profile picture of pink flowers and a close button (X). Below the header, there are three tabs for payment methods: 'Card', 'Alipay', and 'Bitcoin'. The 'Card' tab is selected. The form contains the following fields: an 'Email' field with an envelope icon, a 'Card number' field with a card icon, and two fields for 'MM / YY' (month/year) and 'CVC' (security code) with their respective icons. There is a 'Remember me' checkbox below these fields. At the bottom, there is a large blue button labeled 'Pay €55.00'.

Credit card Iframe checkout form

The image shows a mobile payment interface for a 'Demo Site'. At the top, there is a circular profile picture of pink flowers and a close button (X). Below this, the title 'Demo Site' is centered. A horizontal tab bar contains three options: 'Card', 'Alipay', and 'Bitcoin'. The 'Alipay' tab is currently selected and highlighted. Underneath the tabs, there is a white input field with a pink person icon and the placeholder text 'User ID'. At the bottom of the form is a blue button with the text 'Payment Info' and a right-pointing arrow.

Alipay Iframe checkout form

The image shows a mobile payment interface for a 'Demo Site', similar to the one above but for Bitcoin. It features the same 'Demo Site' header with the flower profile picture and close button. The horizontal tab bar has 'Card', 'Alipay', and 'Bitcoin' options, with 'Bitcoin' now selected and highlighted. The input field below the tabs has a pink envelope icon and the placeholder text 'Email'. The blue 'Payment Info' button with a right-pointing arrow remains at the bottom.

Bitcoin Iframe checkout form

If the customer enters his mobile phone number, Stripe will send a 6-number-verification code to confirm his payment info.

+ Support 3D secure:

When customers use a type of card provided with 3D secure function. Stripe will turn on automatic mode to check. The operation will redirect to the processing page:

Stripe test mode 3D Secure

This is a test transaction.

Amount \$1,010.00
Card Number *****3055

If this was a real transaction, you would be prompted to authenticate yourself.
Instead, choose a response to simulate success or failure.

Press the **Success** button. The inform result will be sent to the customer.

+ Checkout with SEPA Direct Debit

- After filling in the Shipping Address information, the customer chooses **SEPA Direct Debit** as the payment method.
- Enter the necessary information then click on **Place Order** when finishing.

 Stripe SEPA Direct Debit

Making a payment from the backend (MOTO)

Customers do not always purchase online, sometimes they can order via telephone calls or emails. In these cases, it is essential that you - admin can make payments from the backend on behalf of customers.

Using PCS DSS and Stripe v3.2 security standards, you can use customers' saved cards to make payments from the backend for them. In this way, the customer's credit card info will be secured, rather than the admin types of credit card info.

To enable this feature, go to **Stripe Payments > Settings > Stripe Payment Gateway > Stripe Payment** and choose Yes in **Enable MOTO**.

When you create a new order in Magento 2 backend, in **Payment & Shipping Information**, choose **Stripe Credit Card Payment** then fill in the credit card information to make the payment for the order.

Update

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installing steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
