Introduction

Magento 2 Zoho CRM Integration synchronizes data automatically from your Magento 2 store to Zoho CRM.

Features

- Allows synchronizing and updating Customers from Magento store into Zoho CRM Leads, Contacts, Accounts both manually and automatically.
- Allows synchronizing and updating Products from Magento store into Zoho CRM Products both manually and automatically.
- Allows synchronizing Orders from Magento store into Zoho CRM Sales Orders both manually and automatically.
- Allows synchronizing Invoices from Magento store into Zoho CRM Invoices both manually and automatically.
- Admin can manage the field mappings in Magento 2 backend with ease
- It is very easy to use and set up
- Supports multiple languages
- View synchronization history from synchronization report
- View synchronization history in each item for Customers, Orders, and Products
- "Add to queue" mass action for Customers, Orders, Products and Invoices grid tables

System Requirements

Your store should be running on Magento Community Edition version **2.0.x, 2.1.x, 2.2.x, 2.3.x**

Magenest Zoho CRM Version 2.1.5 - Updated: April 7, 2023

Compatibility: Magento 2.3.x, 2.4.x

Compatible with Magento 2.4.6

Video Tutorial

Configuration

Login to the Zoho account

First, you have to create a Zoho account by going to <https://www.zoho.com/crm/>

The image is a screenshot of the Zoho CRM registration page. At the top, there is a navigation bar with the Zoho logo and links for SALES & MARKETING, EMAIL & COLLABORATION, IT & HELP DESK, FINANCE, HR, and BUSINESS PROCESS. Below this, a secondary navigation bar for CRM includes links for Quick Tour, Features, Pricing, Customers, Add-Ons, Resources, and Developers. The main content area has a dark background with a cityscape and a person's silhouette. On the left, the text reads "Zoho CRM is ready. Are you?" followed by a paragraph about multichannel engagement. On the right, there is a registration form with fields for Full Name, Email, and Password. Below the Password field is a link to the Terms of Service and Privacy Policy. A prominent red "CREATE ACCOUNT" button is positioned below the form. At the bottom right, there is a link to "or sign in using" with Google and LinkedIn icons.

Click on the **Create Account** button to register a new account.

Sign in to your Zoho CRM account

[Sign Up Now](#)

Configuration

Go to <https://accounts.zoho.com/developerconsole> to get your Zoho API credentials. (Client ID and Client Secret)

Zoho Client ID Details

Client ID

1000.GV

Client Secret

54c2265

Client Name

Client Domain

http://zoho.demo.izysync.com

Authorized redirect URIs

http://zoho.demo.izysync.com/admin/zohocrm/system_config_getauth/getAuthCode/

Update Client

Cancel

In Magento 2 backend, go to **Zoho CRM Integration > Configuration > Setup**.

Fill in the Client ID and Client Secret obtained from Zoho.

Choose your **Zoho CRM URL Endpoint**: .com or .eu

Remember to **turn off your Admin Key before getting an access token**. You can turn on this Admin Key later after connecting Magento 2 to Zoho CRM successfully.

Go to **Stores > Configuration > Advanced > Admin**, choose No in Add Secret Key to URLs.

Save Report

Yes

You will be redirected to Zoho, in here Zoho will require to access your information. Click **Accept**

Save Report: Enable this to save the synchronization record in View Report.

Synchronization Settings

This extension allows you to synchronize the existing data as well as a new one from Magento 2 store to your Zoho CRM, including **Account, Campaign, Contact, Lead, Order, Invoice, Product**.

We highly recommend that you should synchronize the existing data from Magento 2 store to Zoho CRM account only one time.

You can enable synchronization for each data, as well as synchronization mode (Manual mode and Cron Job mode).

For manual mode, you have to go to Queue Page to sync data.

For cron job mode, data will be synced automatically every 15 minutes, 30 minutes, 1 hour, 2 hours, or at 3 a.m daily.

You can add all data to queue for later processing by clicking on **Sync All Data Now** button.

Synchronization Settings

Field Mapping

In order to synchronize data fields from the Magento 2 store to your Zoho CRM account correctly, you need to create the mapping for these fields first.

Go to **Zoho CRM Integration > Field Mapping**

You can choose the type of data to set the field mapping (Accounts, Contacts, Campaigns, Leads, Products, Sales Orders, Invoices)

The Magento fields and Zoho CRM fields will display in a drop-down list. Choose the status **Enabled** to enable the field, then **Save Mapping**

Mapping Management

Update

- When a bug fix or new feature is released, we will provide you with the module's new package.
- All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests within **2 business days**.
 - We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
 - Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.
-

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
