Introduction

Product Question for Magento 2 by Magenest is an extension that allows customers to make ask question when customers have concerns about the products that they do not know any information about it. Customers are likely to either look for a vendor with detailed descriptions, or look for a different product, or contact a store owner. This module helps not only time-saving, building trust but also for store owner can limit risk of losing prospective customers.

Highlight Features

1. Allow admins to manage questions and answers (edit and approve)
2. Show lists of questions & answers -> product detail
3. Add questions and answers to products (wait for admin approval)
4. Allow customers to vote for questions (customer login)
5. Sort question by number of vote, or by creation date
6. Customer manage in question and answer!
7. Customer manage edit notify-send email
8. Admin manage all question and answer (edit, approve question and answer)

System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.x.

Configuration

[How to install Magenest product question on Magento 2](#)

Navigate to your **Backend of Magento 2 -> Marketing->Settings**

Change the extension status (Is Enable) to Yes and configure the extension as below:

On the **Interface Settings** tab:

- **Number of questions to display** - this option defines how many questions will be shown under the 'Product Questions' section at the product page. If the actual number of questions exceeds this value, the rest will be hidden under an *expand* link.

- **Number of answers to display** - this option defines how many answers will be shown under a question by default. If the actual number of answers exceeds this value, the one(s) with the lowest number of vote will be hidden under an *expand* link.

Email notifications tab:

In this tab, you can configure the notifications settings of the extension. Select the **email contact display** (which will change the display name of the email sender) and **email template** used for sending notification to customers question.

Main Functions

After you install this extension, there will be a **Product Question** tab. Customers will be able to ask questions about a products. If they tick the **Private Question** option, the question can only be seen in the backend menu of the extension (instead of appearing on the product page). Then lick **Ask Question** button to send the question.

When admin has published the answer, it will be shown in the **Product Question** tab of the product:

The screenshot shows the LUMA website interface. At the top, there's a navigation bar with 'LUMA' logo, a search bar, and a shopping cart icon. Below the navigation, there are tabs for 'Sale', 'Training', and 'Women'. The main content area features a product image of a woman in a pink top and grey leggings holding a yoga mat, with the text 'YOGA Adventure' and 'LUMA Fitness Studio'. To the right of the image, the product title 'Yoga Adventure' is displayed, along with the price '\$75.00' and the status 'IN STOCK'. Below the price, there's a description of the product. At the bottom of the page, there's a 'Product Question' tab. Under this tab, there's a search bar and a list of questions. The first question is 'Is this product comfortable with older?' with 1 vote. The second question is 'Is this product really good?' with 2 votes. The answer to the second question is 'yes, it is very good' by Benjamin Ethan. Red callouts point to the question and the answer input field.

To display or hide an answer on the product page, go to the back-end, click on **Marketing-> Manage answer**.
