Introduction

You have got great products on your website but cannot sell them. You don't know where the problem is, but in reality, what you need to do is get your products found. The best way to let people know about your products and services is through search engines. Everyone uses them – Google, Bing, Yahoo, Baidu, the list of search engines is endless. But doing SEO is not easy, especially for a large e-commerce store with hundreds to thousands of products.

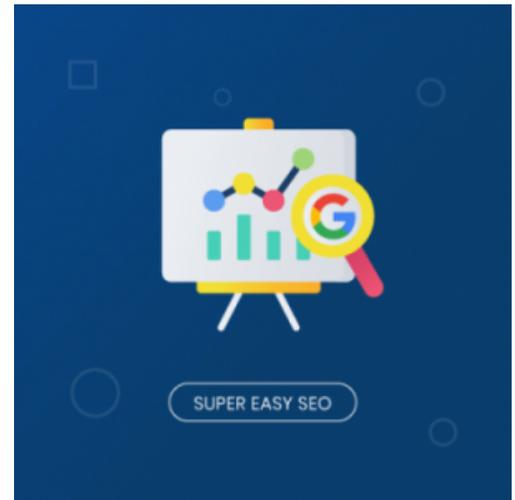

With Super Easy SEO for Magento 2 by Magenest, we will offer customers a toolkit for easily optimizing your SEO metadata.

This extension will cover the whole on page SEO process from creating SEO data, auditing, and fixing SEO data to improve customer SEO experience on the page.

- Configure search bot behaviors
- Add SEO data easily to product and categories SEO templates.
- Manage and audit on page SEO metadata of 1000+ products with ease.
- Add internal and external linking to your sites.
- Improve customer experience with a relevant link redirecting.

System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.

Main Functions

We created a new menu called **Super Easy SEO**. Admin will use this menu to set and manage Magenest's Super Easy SEO extension.

The screenshot shows the Super Easy Seo dashboard. At the top, there's a yellow banner with a message: "You can browse and place orders, but nothing will be processed." Below this, there's a system message icon and a search bar. The main content area displays a summary of sales figures:

Revenue	Tax	Shipping	Quantity
\$0.00	\$0.00	\$0.00	0

Below the summary, there are tabs for "Bestsellers", "Most Viewed Products", "New Customers", and "Customers". A message states: "We couldn't find any records." At the bottom, there's a table with two columns: "Results" and "Uses".

	Results	Uses
	0	1
	1	1

There is also a second table below it:

	Results	Uses
Jackets	1	1
dasd	0	1

The footer contains the copyright notice: "Copyright © 2017 Magento Commerce Inc. All rights reserved." and a "Tutorial Menu" button.

+ Crawling and indexation

- The setting in this section will control how search bots will crawl your store website
- Firstly, the admin needs to start by navigating to **Super Easy SEO >Crawling and Indexation**

The screenshot shows the Configuration page for Super Easy Seo. The left sidebar has a menu with categories: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, SUPER EASY SEO, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled "Configuration" and has a "Store View: Default Config" dropdown and a "Save Config" button.

The "MAGENEST" section is expanded to show "Super Easy Seo" settings:

- Enable Magenest Robot Meta Tag** (toggle: ON)
- Enable Robot Meta Tag** (store view): Yes
- Non-CMS Pages** (collapse icon):
 - Search Pages: INDEX, FOLLOW
 - Send Product Pages: INDEX, FOLLOW
 - Wishlist Pages: INDEX, FOLLOW
 - RSS Feeds: INDEX, FOLLOW
 - Product Compare Pages: INDEX, FOLLOW
 - Contact Us Page: INDEX, FOLLOW
 - Customer Account Pages: INDEX, FOLLOW
 - Checkout Pages: INDEX, FOLLOW
- Additional Pages** (collapse icon): Can be either a full action name or a request path. Wildcard allowed

The footer contains the "Tutorial Menu" button.

In this section, you might change your setting for your robot meta tag for different pages, including non-CMS pages and additional pages. For each page, you can set the meta robot to index/noindex, follow/nofollow. This will change the behavior of search bots on your pages.

Index: your page will be listed on search engine result pages.

Noindex: your page will not be listed on search engine result pages.

Follow: When there are links on the current page, the SEO value will be passed from the current page to the pages that are linked to.

Nofollow: When there are links on the current page, the SEO value will not be passed from the current page to the pages that are linked to.

➔ The following sites are currently supported in the Super Easy SEO meta robot:

- **Search pages:** The search result page that appears when you search for a product
- **Wishlist Pages:** This is the page that lists products that customers have added to their wishlists.
- **RSS Feeds:** This is a product listing page.
- **Product compare Pages:** This kind of page appears when you compare different products with one another.
- **Contact us page:** This is where you usually introduce your company and staff.
- **Customer Account Page:** This page show customer personal information and only appears when they log in
- **Check out page:** this is where you enter your payment information and address.

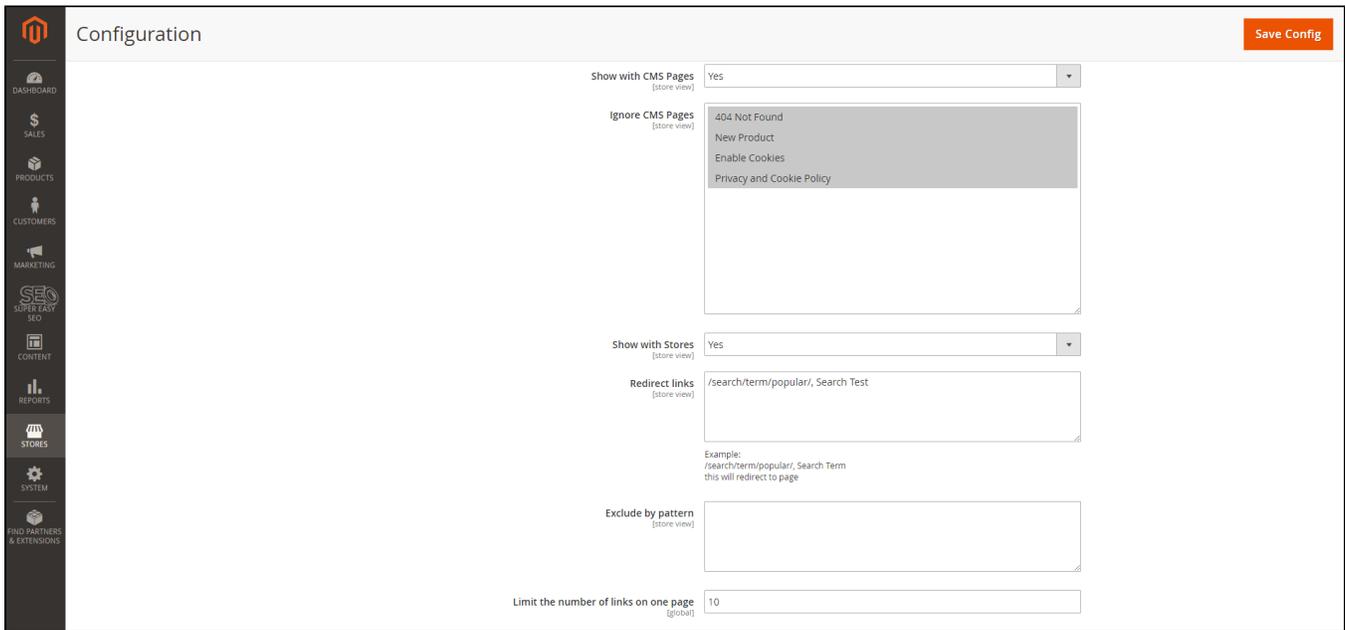

The screenshot shows the 'Configuration' page for Super Easy SEO. On the left is a sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Super Easy SEO, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Under the 'Super Easy Seo' section, there is a dropdown menu with options: CUSTOMERS, SALES, SERVICES, and ADVANCED. To the right, the 'Additional Pages' section is active, showing a list of URL patterns with their corresponding Robots Meta Headers. The examples provided are: 'sitemap_+' with 'INDEX, FOLLOW', 'sitemap/*' with 'INDEX, FOLLOW', 'rss_+' with 'NOINDEX, FOLLOW', and 'rss/*' with 'INDEX, NOFOLLOW'. Below these are four text input fields for custom configurations, each with a 'store view' link. The bottom of the page has a 'Sitemap Settings' link and a 'Tutorial Menu' button.

- **Additional pages:** This is where you can specify pages that you want to control search bots behavior by using URL patterns.

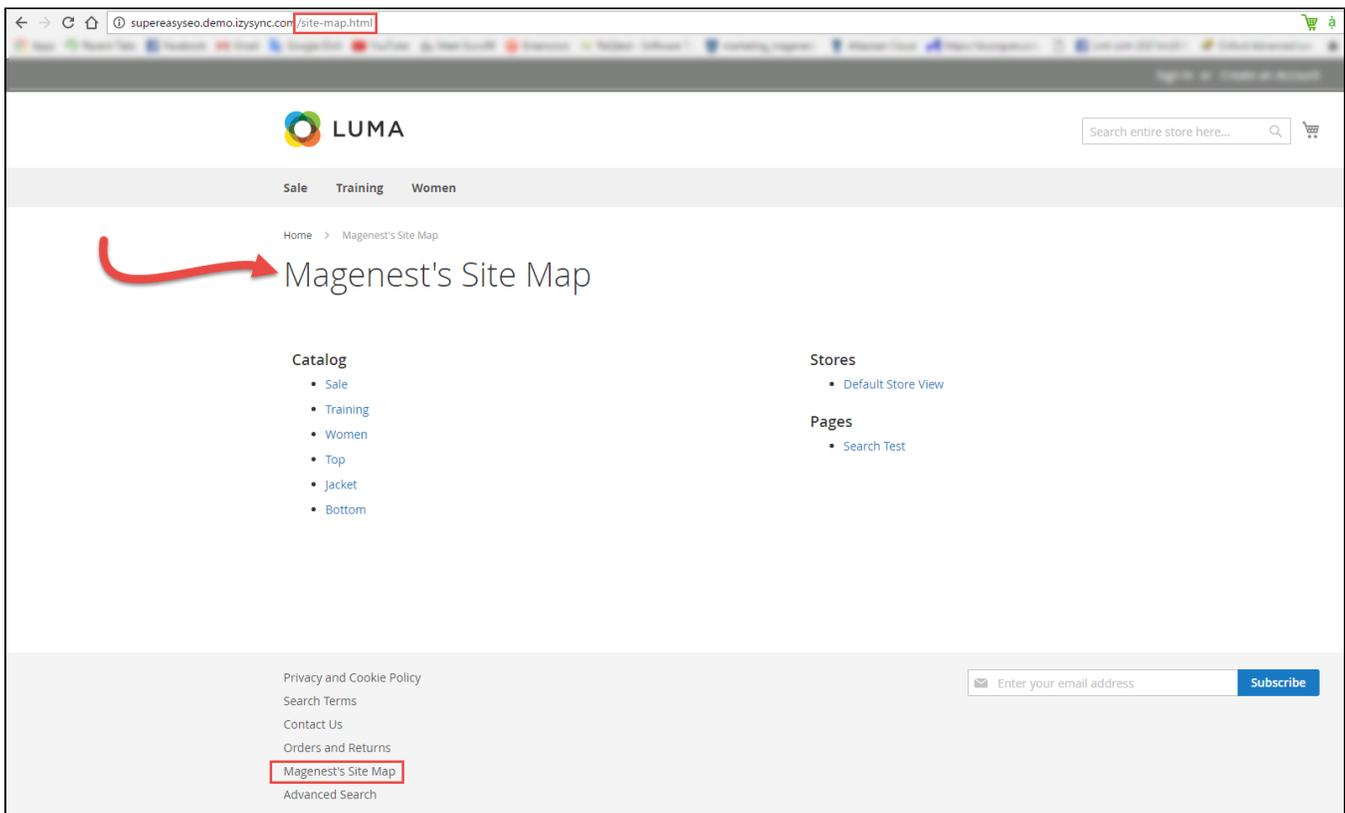

The screenshot shows the 'Configuration' page for Super Easy SEO, specifically the 'Sitemap Settings' section. The sidebar is the same as in the previous screenshot. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Under the 'Super Easy Seo' section, there is a dropdown menu with options: GENERAL, CATALOG, MAGENEST, Super Easy Seo, CUSTOMERS, SALES, SERVICES, and ADVANCED. The 'Sitemap Settings' section is active, showing several configuration options: 'URL Rewrite' (site-map), 'Meta Title' (Magenest's Site Map), 'Meta Keywords' (Site Map), 'Meta Description' (A sitemap is a file where you can list the web pages of your site to tell Google and other search engines about the organization of your site content. Search engine web crawlers like Googlebot read this file to more intelligently crawl your site.), 'H1 Header (Title footer)' (Magenest's Site Map), 'Show with Products' (Yes), 'Show with CMS Pages' (Yes), and 'Ignore CMS Pages' (404 Not Found, New Product, Enable Cookies, Privacy and Cookie Policy). Each option has a 'store view' link.

➕ **Sitemap Settings:** Store managers can provide search engines with a structural map of their site to make it easier for bots to crawl the site and index content faster.

The back-end sitemap is an xml file used for submission to search engines,

Admins can set which pages will be included in the HTML site map on the front-end menu.

On the other hand, the front-end sitemap is an html file that shows customers an overall view of your site structure. This allows admins to arrange all their store links all in one place. So, customers can easily have an overview of the whole site structure and find the categories or products they need.

+ Rich Snippet Settings:

You can add schema data to your pages so that search engines will be able to show more data about them. In the current version, Magenest's Super Easy SEO supports 6 types of rich snippet schema: **Product, Category, Page, Website, Store, Breadcrumbs**.

Product: these schema types allow your products to show more specific detail to the search engine result page, including data for Facebook Open Graph, Twitter Cards, Product Rating, SKU, Category, Color, Manufacturer, Model, GTIN, Weight, Condition, Properties, and more.

Configuration Save Config

ADVANCED

Best Rating [store view] 100

Description Attribute Code [store view] sku (SKU)

Attach SKU [store view] Yes

SKU Attribute Code [store view] sku (SKU)

Attach Category [store view] No

Attach Color [store view] No

Attach Manufacturer [store view] No

Attach Model [store view] No

Attach Gtin [store view] No

Attach Weight [store view] Yes

Attach Condition [store view] No

Add Custom Properties [store view] Yes

Custom Properties [store view]

A comma-delimited list of schema.org property name and attribute codes.
Example:
 mpn,mpn_code
 For JSON-LD will be converted to:
 { ... "mpn": "12345" ... }

The product schema gives you different metadata to display in the search engine.

Enable In Open Graph [store view] Yes

Show Product Offers [store view] Yes

Disable for NOINDEX Robots [store view] No

Page

Enable In Open Graph [store view] Yes

Enable In Twitter Cards [store view] Yes
 To enable the feature, make sure you enter Twitter Username in the Common section.

Website

Enable In Rich Snippets [store view] Yes

Enable In Open Graph [store view] Yes

Enable In Twitter Cards [store view] Yes
 To enable the feature, make sure you enter Twitter Username in the Common section.

Website Name [store view] Magenest

Website About [store view] New Magenest

Tutorial Menu

Category: Here you can insert metadata for Facebook Open graph, or show product offers on the search engine result page.

Page: this rich snippet type supports Facebook Open Graph and Twitter Cards.

Website: This schema type provides you with templates for Facebook Open Graph, Twitter Cards, Website Name, and Website Introduction (About).

Store Owner

Enable In Rich Snippets (store view)

Type (list on Schema.org) (store view)

Name (store view)

Description (store view)

Social Links (store view)

The list of social media links
Example:
<https://twitter.com/magenest>
<https://www.facebook.com/magenest>

Phone (store view)

Fax (store view)

Email (store view)

Location (store view)

Region Id (store view)

Street (store view)

ZIP Code (store view)

Tutorial Menu

Store: In this schema type, you can choose a schema group that is related to your store. You can choose the industry you are in, the name of your store, the store description, links to social media pages, and contact details such as phone, fax location, region ID, street and ZIP code.

Breadcrumbs: this schema type will tell search engines the breadcrumb structure of your current pages.

Twitter: here you can enter your twitter username to use twitter cards in the above schema types.

★ Mass SEO Content Generator

+ SEO Product Template

With the template product feature, admins can easily create a list of sample templates for the products on their store.

In order to create a new product template, please go to **Super Easy SEO > Product > Add New Template**.

Then, the **New Template** page will appear. The extension supports all of the fields that most of the merchants need (Store Views, Categories, Name, Template Url Key, Template Description, Template Short Description, Template Meta Title, Template Meta Description).

Also, it provides 3 options to choose from, include:

➔ All Products

The screenshot shows the 'New Template' form in a Magento admin interface. The left sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, SEO, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'TEMPLATE' and has a 'General' tab selected. The 'General Information' section includes the following fields:

- Is Activated:** Yes (dropdown)
- Assign Type:** All Products (circled in red with a '1'), By Attribute Set, Specific Products
- Store Views:** All Store Views (dropdown)
- Categories Set:** A list box containing Default, Women, Top, Bottom, and Jacket.
- Name:** Template 2
- Template Url Key:** /magento-2
- Template Description:** Magenest is a provider of Magento e-commerce solutions to businesses all around the world. With over 5 years of experience in
- Template Short Description:** With over 5 years of experience in e-commerce, we devote ourselves to delivering high quality solutions and providing exception
- Template Meta Title:** Magenest - Best E-commerce Solutions
- Template Meta Description:** Magenest is leading E-commerce company with professional E-commerce solutions by Magento and Woocommerce. Some note here
- Priority:** 1
- Apply For:** Empty (dropdown)

➔ By Attribute Set

The screenshot shows the 'New Template' form in a Magento admin interface. The left sidebar is the same as in the previous image. The main content area is titled 'New Template' and has a search bar and user profile in the top right. The 'TEMPLATE' section has an 'Attribute Set' dropdown menu set to 'Default'. Below this, the 'General Information' section includes the following fields:

- Is Activated:** Yes (dropdown)
- Assign Type:** All Products, By Attribute Set (circled in red with a '2'), Specific Products

A green dashed arrow points from the 'By Attribute Set' radio button to the 'Attribute Set' dropdown menu. At the bottom of the page, there is a copyright notice: 'Copyright © 2017 Magento Commerce Inc. All rights reserved.' and the version 'Magento ver. 2.1.3' with a 'Report Bugs' link.

➔ Specific Products

The screenshot shows the 'New Template' interface. On the left, a sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, Super Easy SEO, Content, Reports, Stores, System, and Find Partners & Extensions. The main area is titled 'New Template' and includes a search bar, 'Back', 'Reset', 'Save and Continue Edit', and a 'Save' button. Below the search bar, there's a 'TEMPLATE' section with 'General' and 'Products Apply' tabs. The 'Products Apply' tab is active, and a red circle with the number '3' is placed over the 'Specific Products' radio button in the 'Assign Type' section. To the right, a table displays 6 records with columns for ID, Name, Type, SKU, and Price. A red circle with the number '3' is also placed over the 'Specific Products' radio button in the 'Assign Type' section.

ID	Name	Type	SKU	Price
2	Riona Full Zip Jacket	simple	Riona Full Zip Jacket	\$12.00
3	Ingrid Running Jacket	virtual	Ingrid Running Jacket	\$85.00
4	Yoga Adventure	downloadable	Yoga Adventure	\$75.00
5	Jackets	grouped	Jackets	\$0.00
6	Harmony Lumaflex™ Strength Band Kit	bundle	Harmony Lumaflex™ Strength Band Kit	\$35.00
10	Nadia Elements Shell	configurable	Nadia Elements Shell	\$8.00

➕ SEO Category Template

With the template product feature, admins can easily create a list of sample templates for the categories on their store.

In order to create a new product template, please go to **Super Easy SEO > SEO Product Template > Add New Template**.

The screenshot shows the Super Easy SEO extension interface. The sidebar on the left has a menu with items like 'Crawling and Indexation', 'Mass SEO Content Generator', 'SEO Product Template' (highlighted with a red box), 'SEO Category Template', 'On-site experience', 'Cross Linking', 'Redirect Management', 'Image Optimizer', 'SEO Quality Analysis', 'Preview Product', and 'Preview Category'. The main area displays a table with 2 records found. The table has columns for Name, Type, Enabled, Assign Type, and Action. The 'Add New Template' button is highlighted with a red box.

Name	Type	Enabled	Assign Type	Action
product	product	ENABLED	Specific Products	Select
TEST	product	ENABLED	All Products	Select

Then, the **New Template** page will be shown. The extension supports all of the fields that most of the merchants need (Store Views, Name, Url Key, Template Description, Template Meta Title, Template Meta Description).

Also, it provides 2 options to choose from, include:

★ On-site experience

This section helps to improve customer onsite experience by managing linking, redirection and image loading speed.

+ Cross Linking

This feature allows admins to create a list of keywords and each one will become a hyperlink that contains a link to another page. Admins only need to type these keywords into their content and links will be automatically added to the anchor text.

In order to create a new cross link, please go to the **Super Easy SEO > Cross Linking > Add new Crosslink**. The following settings will be available for the cross link function.

Is Activated: Enable or disable the crosslink function.

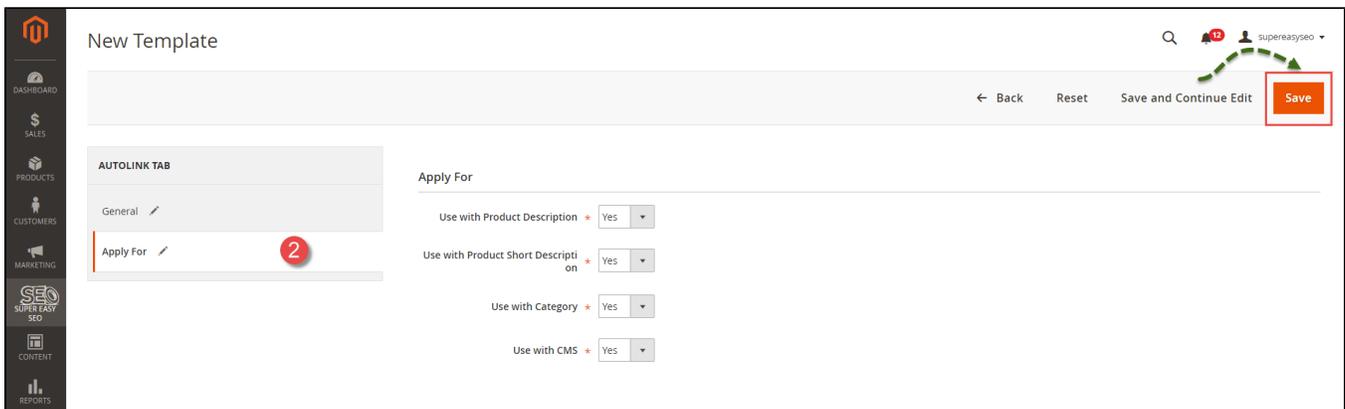

Keyword: Add the trigger keyword to auto insert link.

URL Title: The title of the anchor text, which will appear when you hover your mouse over it.

URL: This is the actual link that will be inserted into the anchor text.

URL Target: control the behavior of the link when someone clicks on it. "_self" means the link will open in the same tab while "_blank" means the link will open in the new tab.

Priority: Set priority for the cross linking rule. When there are multiple similar rules, rules with priority will override rules with no priority.

Apply for:

After admins have configured the cross-linking setting, they can control which section of their store will use this rule. You can enable or disable the rule for product descriptions, product short descriptions, category, CMS pages.

+ Redirect management

This function helps you to control redirecting behavior using URL patterns.

Is activated: Enable or Disable the function.

Request URL: the url that customers type into the browser bar or click on.

Target URL: the url that admins want the requested page to redirect to.

Visible in Store view: Choose which Store View will this redirecting rule be used.

+ Image optimizer

This toolkit helps store managers to compress their images to improve site loading time while still maintaining image quality.

To use this toolkit, head on to **Image Optimizer > Add new Template >**

On the **General Information Tab**, there are different

Batch size: The maximum number of images that will be compressed each session.

Path: the path to the folder that stores your images.

Use system with 64-bit: recommended setting to **No**

GIF Format: the tool used for optimizing .gif images.

GIF Options: settings for optimization of .gif images.

JPG Format: optimization tool for .jpg images.

JPG Options: settings for optimization of .jpg images.

PNG Format: optimization tool for .png images.

PNG Options: setting for optimization of .png images.

The screenshot shows the 'Edit Template' page in the Magento Admin interface. The left sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, Super Easy SEO, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area has a yellow success message: 'Scan and reindex operations completed successfully.' Below this is the 'OPTIMIZER TAB' with sections for 'General Information', 'Optimize Images', and 'List Images'. The 'Optimize Images' section is active, showing 'Scan Images' and 'Optimization Process' buttons. Red arrows point to links: 'click here to scan images for optimization' and 'click here to optimize images'. At the bottom right, it says 'Magento ver. 2.1.3' with links for 'Account Activity' and 'Report Bugs'. A 'Tutorial Menu' button is at the bottom right.

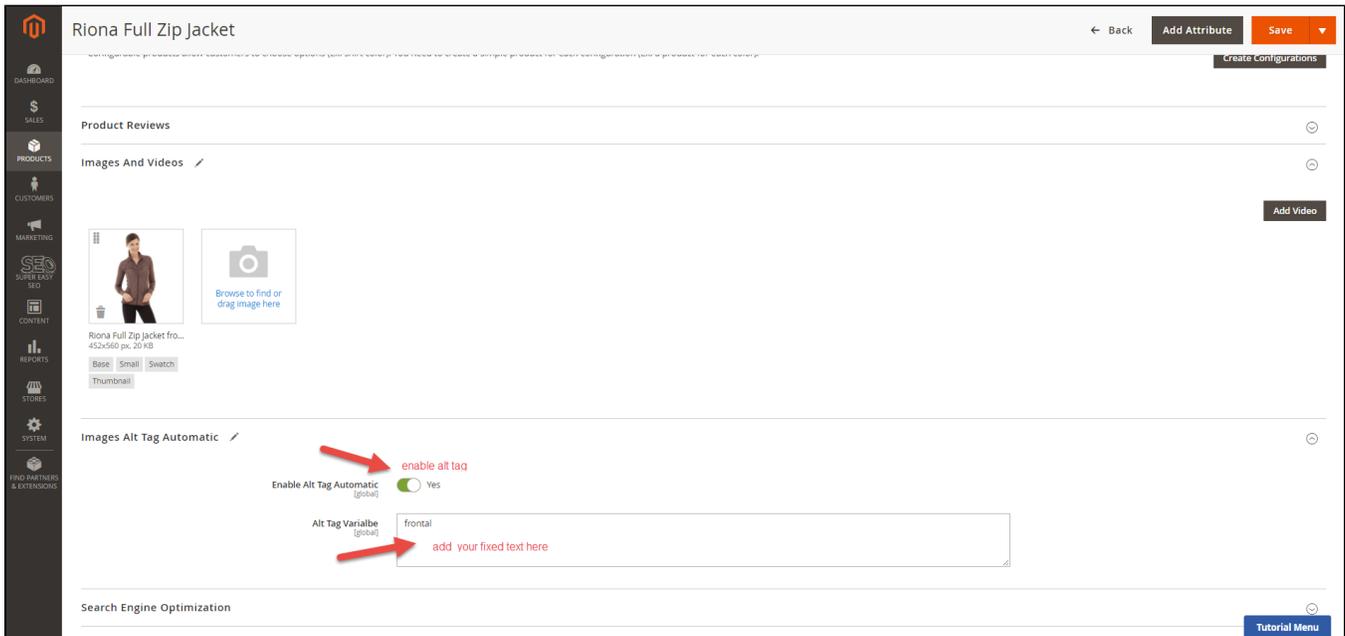

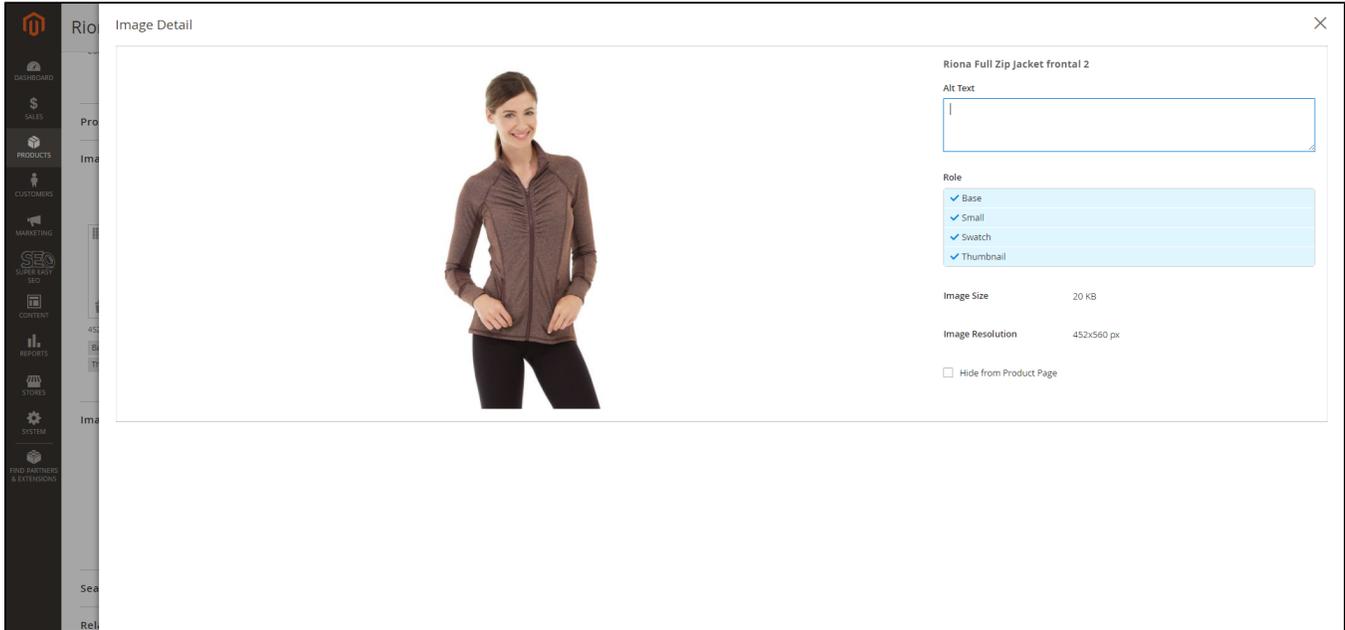

Once you have configured the setting, start scanning your images and optimize them. click on **Start Scan Images** and **Start Optimization Process**

The screenshot shows the 'List Images' page in the Magento Admin interface. It displays a table of 18 images that have been optimized. The table has columns for ID, Path, Status, Size Before (kB), and Size After (kB). The status for all images is 'Optimized', indicated by a green bar. The size after optimization is consistently smaller than the size before optimization. A search bar and filter options are at the top of the table. A 'Tutorial Menu' button is at the bottom right.

ID	Path	Status	Size Before (kB)	Size After (kB)
1	/home/supereasyseo/public_html/pub/errors/default/images/msg-error.gif	Optimized	1.00900	1.00900

13	/home/supereasyseo/public_html/pub/media/catalog/product/u/ug03-bk-0_1.jpg	Optimized	30.95500	30.95500
14	/home/supereasyseo/public_html/pub/media/catalog/product/d/e/deluxe_king.jpg	Optimized	46.99000	46.99000
15	/home/supereasyseo/public_html/pub/media/catalog/product/d/o/download_products_1.jpg	Optimized	40.17800	40.17800
16	/home/supereasyseo/public_html/pub/media/catalog/product/m/email_1.png	Optimized	105.96700	105.96700
17	/home/supereasyseo/public_html/pub/media/catalog/product/wj/wj05-brown_main.jpg	Optimized	20.44200	20.44200
18	/home/supereasyseo/public_html/pub/media/catalog/product/wj/wj06-purple_main.jpg	Optimized	21.46300	21.46300

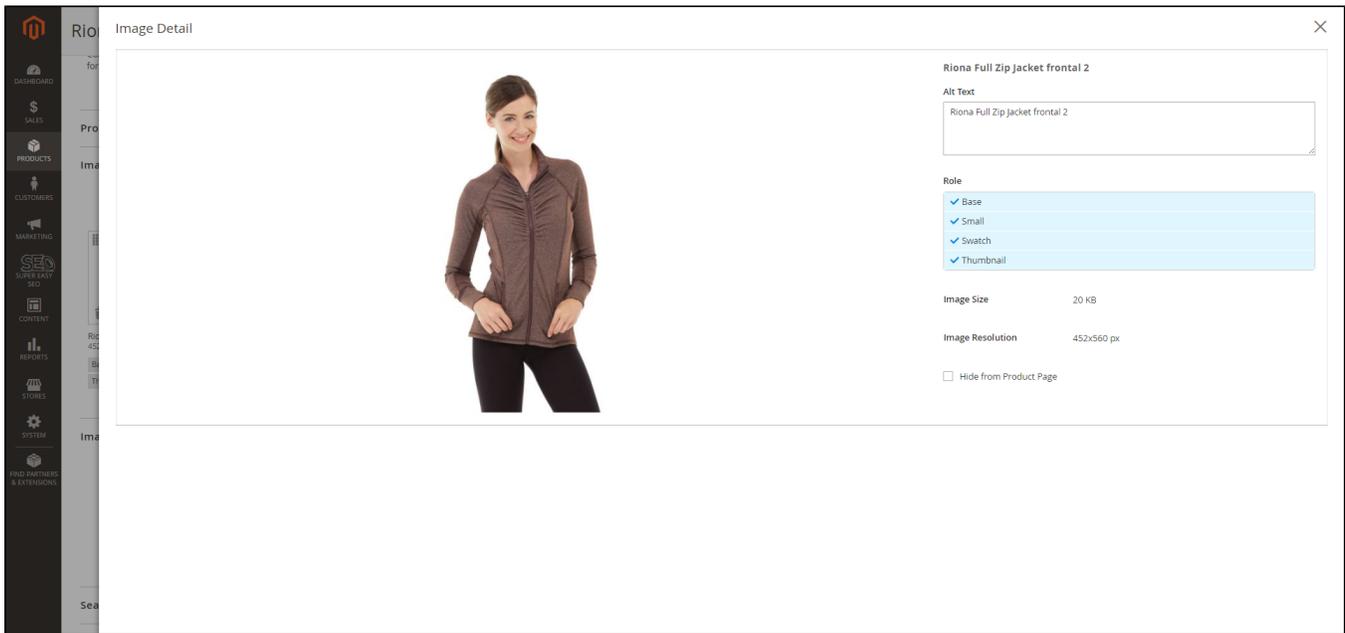

On the **List Images** tab, admins can see the optimization status of images. **Optimized** means images have been optimized, while **unoptimized** means images have not been optimized.

+ Mass image alt tag: When customers create new products, they can enable image alt tag generator to let the extension automatically create alt tags for product images based on the product's name.

➔ To use Automatic Image Tag, first, within each product, enable the automatic alt tag function

➔ Insert Alt Tag Variable to create variation for your images and prevent alt tag duplication.

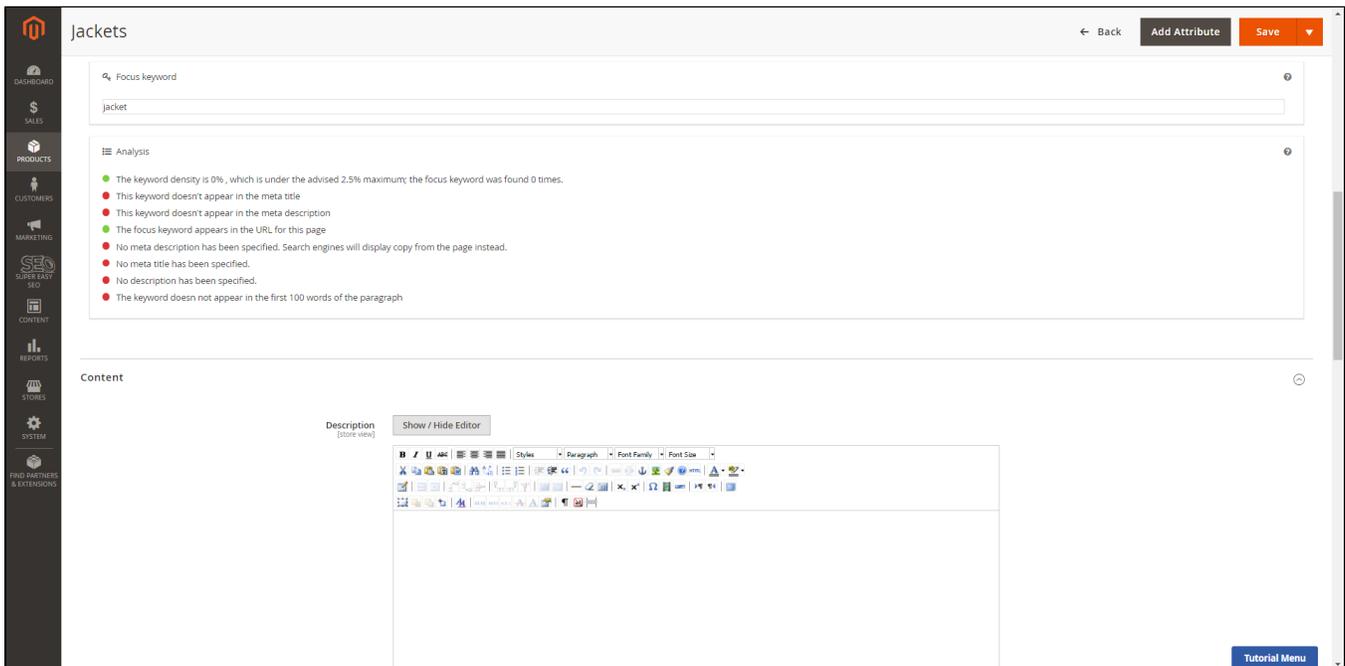

The image alt tag will be generated based on the product name and the alt tag variable.

★ SEO Quality Analysis:

This function group deals with managing SEO metadata quality and content quality.

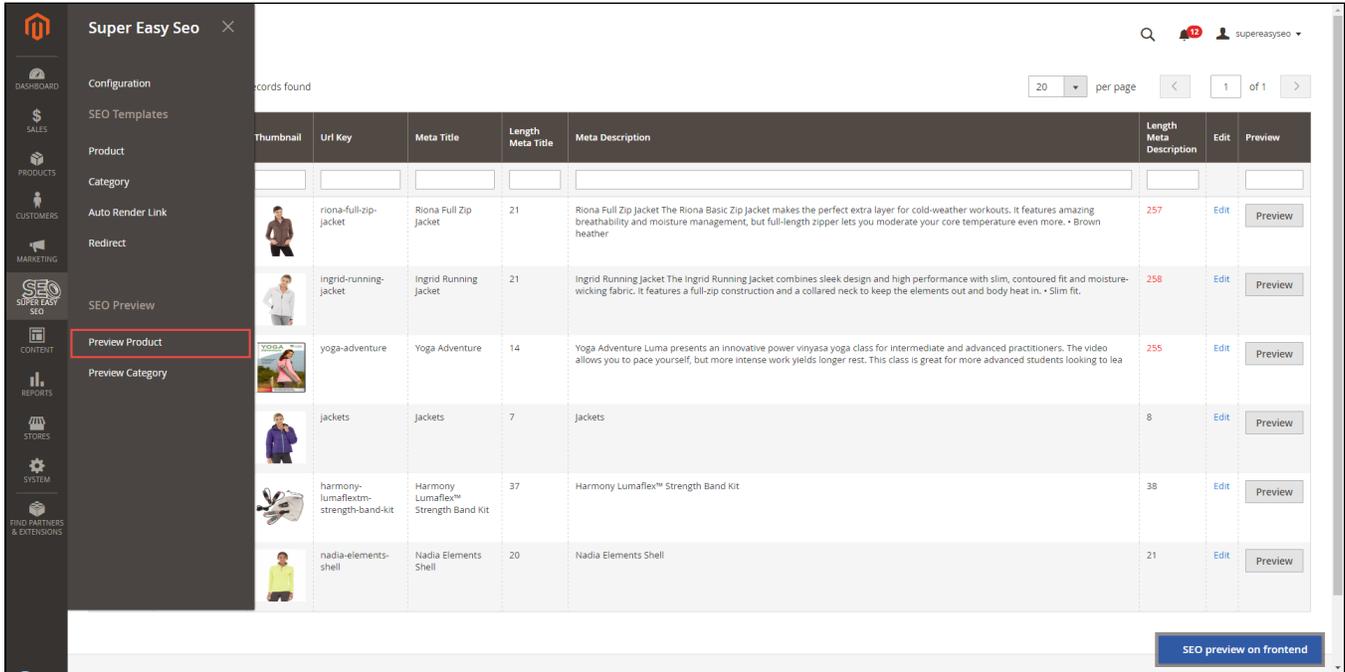

+ Content Analysis:

Allow you to set a focus keyword for your content and perform content analysis based on that keyword and our custom built SEO criteria.

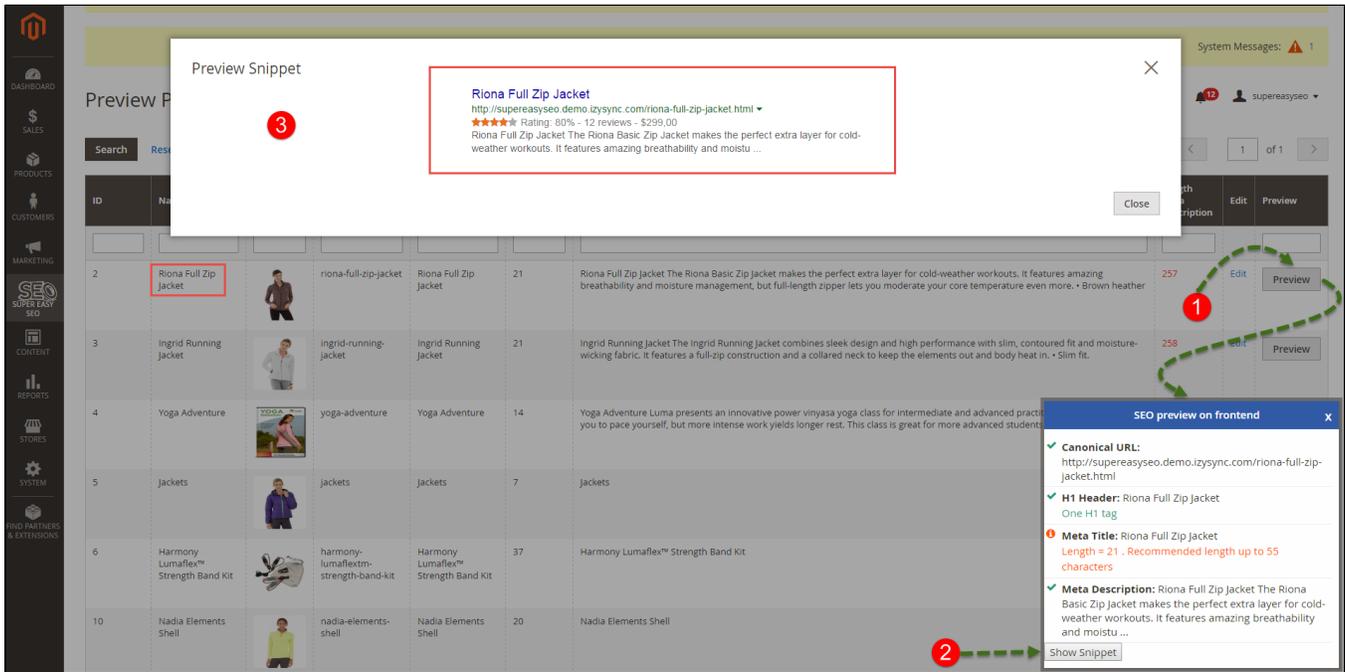

To use these features, head on to your product and scroll down to the **Content Analysis** section within your product.

Set a focus keyword to become your point of analysis. We will compare your content and focus keywords to evaluate your content SEO quality.

+ Preview Product and Category SEO metadata.

Customers can see the URL key, meta title, meta title length, meta description, and meta description length of your products and categories. Any metadata that exceeds the required length will be highlighted in red for your attention.

+ Preview Category

Similar to product preview, you would also be able to assess the length of your metadata and adjust them to SEO standards accordingly.
