Introduction

You have got great products on your website but cannot sell them. You don't know where the problem is, but in reality, what you need to do is get your products found. The best way to let people know about your products and services is through search engines. Everyone uses them – Google, Bing, Yahoo, Baidu, the list of search engines is endless. But doing SEO is not easy, especially for a large e-commerce store with hundreds to thousands of products.

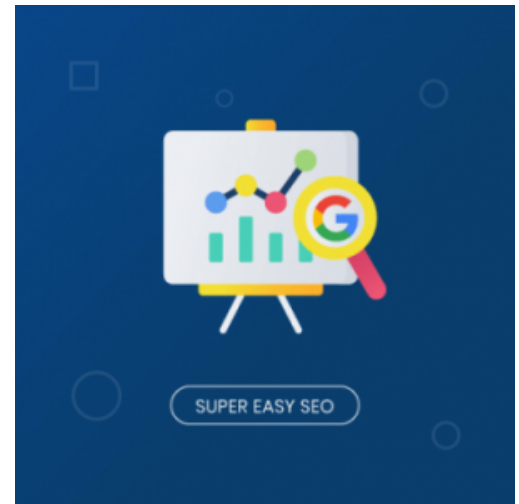

With Super Easy SEO for Magento 2 by Magenest, we will offer customers a toolkit for easily optimizing your SEO metadata.

This extension will cover the whole on page SEO process from creating SEO data, auditing, and fixing SEO data to improve customer SEO experience on the page.

- Configure search bot behaviors
- Add SEO data easily to product and categories SEO templates.
- Manage and audit on page SEO metadata of 1000+ products with ease.
- Add internal and external linking to your sites.
- Improve customer experience with a relevant link redirecting.

System Requirements

Your store should be running on Magento 2 Community Edition version 2.1.

Main Functions

We created a new menu called **Super Easy SEO**. Admin will use this menu to set and manage Magenest's Super Easy SEO extension.

Additional Pages

Can be either a full action name or a request path. Wildcard allowed

Tutorial Menu

In this section, you might change your setting for your robot meta tag for different pages, including non-CMS pages and additional pages. For each page, you can set the meta robot to index/noindex, follow/nofollow. This will change the behavior of search bots on your pages.

Index: your page will be listed on search engine result pages.

Noindex: your page will not be listed on search engine result pages.

Follow: When there are links on the current page, the SEO value will be passed from the current page to the pages that are linked to.

Nofollow: When there are links on the current page, the SEO value will not be passed from the current page to the pages that are linked to.

➔ The following sites are currently supported in the Super Easy SEO meta robot:

- **Search pages:** The search result page that appears when you search for a product
- **Wishlist Pages:** This is the page that lists products that customers have added to their wishlists.
- **RSS Feeds:** This is a product listing page.
- **Product compare Pages:** This kind of page appears when you compare different products with one another.
- **Contact us page:** This is where you usually introduce your company and staff.
- **Customer Account Page:** This page show customer personal information and only appears when they log in
- **Check out page:** this is where you enter your payment information and address.

The screenshot shows the 'Configuration' page for 'Super Easy Seo'. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, SUPER EASY SEO (active), CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Below the title is a sub-header 'Super Easy Seo'. A left sidebar lists categories: CUSTOMERS, SALES, SERVICES, and ADVANCED. The main section is titled 'Additional Pages' and contains a description: 'Can be either a full action name or a request path. Wildcard allowed. Examples: sitemap_*, sitemap/*, rss_*, rss/*'. Below this are four text input fields for robots meta headers: 'INDEX, FOLLOW Robots Meta Header for Additional Pages', 'NOINDEX, FOLLOW Robots Meta Header for Additional Pages', 'INDEX, NOFOLLOW Robots Meta Header for Additional Pages', and 'NOINDEX, NOFOLLOW Robots Meta Header for Additional Pages'. The last field contains the text 'SEO*'. At the bottom, there is a 'Sitemap Settings' section and a 'Tutorial Menu' button.

- **Additional pages:** This is where you can specify pages that you want to control search bots behavior by using URL patterns.

The screenshot shows the 'Configuration' page for 'Super Easy Seo'. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, SUPER EASY SEO (active), CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Below the title is a sub-header 'Super Easy Seo'. A left sidebar lists categories: GENERAL, CATALOG, MAGENEST, and Super Easy Seo. The main section is titled 'Sitemap Settings' and contains several fields: 'URL Rewrite' (site-map), 'Meta Title' (Magenest's Site Map), 'Meta Keywords' (Site Map), 'Meta Description' (A sitemap is a file where you can list the web pages of your site to tell Google and other search engines about the organization of your site content. Search engine web crawlers like Googlebot read this file to more intelligently crawl your site.), 'H1 Header (Title footer)' (Magenest's Site Map), 'Show with Products' (Yes), 'Show with CMS Pages' (Yes), and 'Ignore CMS Pages' (404 Not Found, New Product, Enable Cookies, Privacy and Cookie Policy). At the bottom, there is a 'Tutorial Menu' button.

➕ **Sitemap Settings:** Store managers can provide search engines with a structural map of their site to make it easier for bots to crawl the site and index content faster.

The back-end sitemap is an xml file used for submission to search engines,

Admins can set which pages will be included in the HTML site map on the front-end menu.

On the other hand, the front-end sitemap is an html file that shows customers an overall view of your site structure. This allows admins to arrange all their store links all in one place. So, customers can easily have an overview of the whole site structure and find the categories or products they need.

★ On-site experience

This section helps to improve customer onsite experience by managing linking, redirection and image loading speed.

The screenshot shows the 'New Template' page in the Super Easy SEO interface. On the left is a vertical sidebar with icons for Dashboard, Sales, Products, Customers, Marketing, Super Easy SEO, Content, Reports, Stores, System, and Find Partners & Extensions. The main area is titled 'New Template' and has a search icon, a notification bell with '14', and a user profile 'supereasyseo'. Below the title bar are buttons for 'Back', 'Reset', 'Save and Continue Edit', and a red 'Save' button. The 'CROSSLINK TAB' is active, with a sub-tab 'General' selected. The 'General Information' section contains the following fields: 'Is Activated' (set to 'No'), 'Keyword' (set to 'SEO'), 'Url Title' (set to 'Super Easy SEO'), 'Url' (set to 'https://store.magenest.com/super-easy-seo'), 'Url Target' (set to '_self'), 'Store Views' (a dropdown menu showing 'All Store Views', 'Main Website', 'Main Website Store', and 'Default Store View'), and 'Priority' (an empty text field). A 'Tutorial Menu' button is at the bottom right.

+ Cross Linking

This feature allows admins to create a list of keywords and each one will become a hyperlink that contains a link of another page. Admins only need to type these keywords into their content and links will be automatically added to the anchor text.

In order to create a new cross link, please go to the **Super Easy SEO > Cross Linking > Add new Crosslink**. The following settings will be available for the cross link function.

Is Activated: Enable or disable the crosslink function.

Keyword: Add the trigger keyword to auto insert link.

URL Title: The title of the anchor text, which will appear when you hover your mouse over it.

URL: This is the actual link that will be inserted into the anchor text.

URL Target: control the behavior of the link when someone clicks on it. "_self" means the link will open in the same tab while "_blank" means the link will open in the new tab.

Priority: Set priority for the cross linking rule. When there are multiple similar rules, rules with priority will override rules with priority.

The screenshot shows the 'New Template' page in the Super Easy SEO interface, similar to the first one but with the 'AUTOLINK TAB' selected. The 'General' sub-tab is also visible. The 'Apply For' section contains four checkboxes: 'Use with Product Description' (checked), 'Use with Product Short Description' (checked), 'Use with Category' (checked), and 'Use with CMS' (checked). A red circle with the number '2' is placed over the 'Apply For' sub-tab. The 'Save' button is highlighted with a red box. A green dashed arrow points from the 'Save' button in this screenshot to the 'Save' button in the first screenshot.

Apply for:

After admins have configured the cross-linking setting, they can control which section of their store will use this rule. You can enable or disable the rule for product descriptions, product short descriptions, category, CMS pages.

+ Redirect management

This function helps you to control redirecting behavior using URL patterns.

Is activated: Enable or Disable the function.

Request URL: the url that customers type into the browser bar or click on.

Target URL: the url that admins want the requested page to redirect to.

Visible in Store view: Choose which Store View will this redirecting rule be used.

The screenshot shows the 'Super Easy Seo' sidebar on the left with 'Redirect Management' highlighted. The main content area displays a table of redirects. A yellow banner at the top states: 'You can browse and place orders, but nothing will be processed.' Below it, a system message says 'System Messages: 1'. A search bar and a list of filters are visible. The table has columns for Request Url, Target Url, Status, and Action. Two records are shown, both with 'ENABLED' status. A 'Tutorial Menu' button is in the bottom right.

Request Url	Target Url	Status	Action
/request	/test	ENABLED	Edit
/test	/	ENABLED	Edit

The screenshot shows the 'Redirect Template' interface. It includes a search bar, a list of filters, and a table of redirects. The table has columns for ID, Request Url, Target Url, Status, and Action. Two records are shown, both with 'ENABLED' status. A 'Tutorial Menu' button is in the bottom right.

ID	Request Url	Target Url	Status	Action
2	/admin	/home	ENABLED	Edit
1	/test	/sale	ENABLED	Edit

Path: the path to the folder that stores your images.

Use system with 64-bit: recommended setting to **No**

[Tutorial Menu](#)

On the **List Images** tab, admins can see the optimization status of images. **Optimized** means images have been optimized, while **unoptimized** means images have not been optimized.

+ Mass image alt tag: When customers create new products, they can enable image alt tag generator to let the extension automatically create alt tags for product images based on the product's name.

- To use Automatic Image Tag, first, within each product, enable the automatic alt tag function
- Insert Alt Tag Variable to create variation for your images and prevent alt tag duplication.

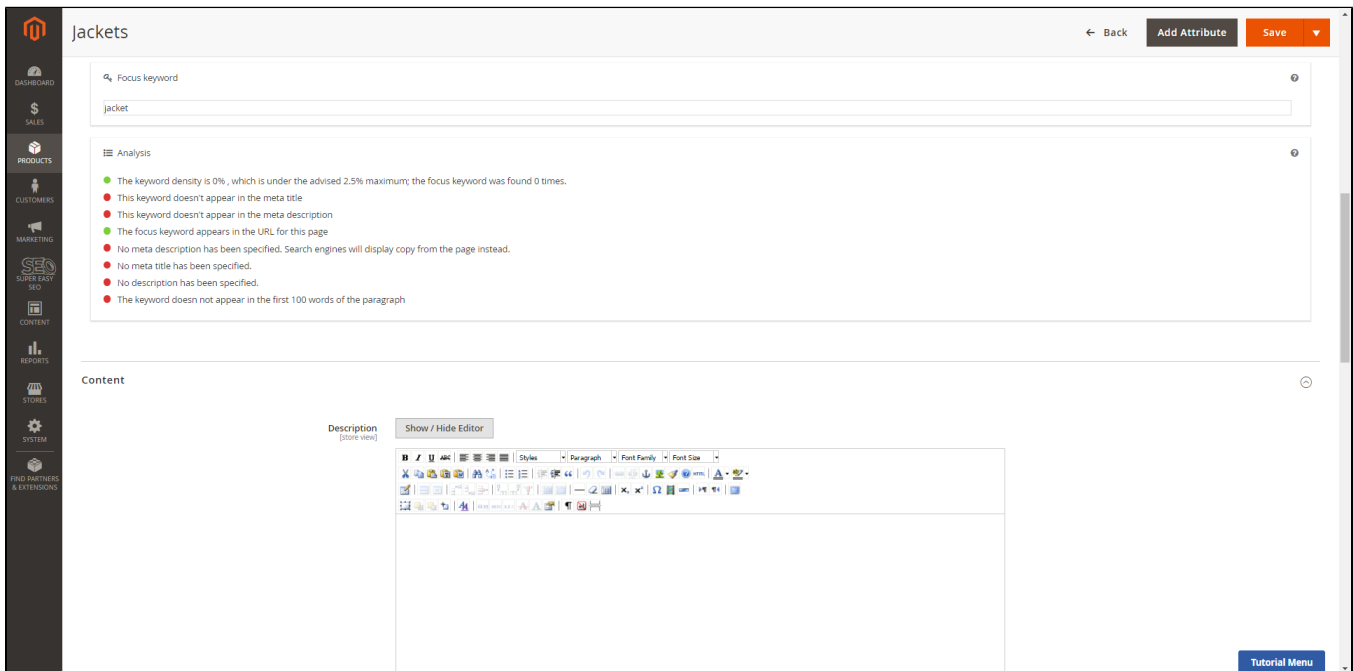

The image alt tag will be generated based on the product name and the alt tag variable.

★SEO Quality Analysis:

This function group deals with managing SEO metadata quality and content quality.

+Content Analysis:

Allow you to set a focus keyword for your content and perform content analysis based on that keyword and our custom built SEO criteria.

To use these features, head on to your product and scroll down to the **Content Analysis** section within your product.

Set a focus keyword to become your point of analysis. We will compare your content and focus keywords to evaluate your content SEO quality.

- When a new update is available, we will provide you with a new package containing our updated extension.
- You will have to delete the module directory and repeat the installing steps above.
- Flush the config cache. Your store and newly installed module should be working as expected.

Support

- We will reply to support requests after **2 business days**.
- We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
- Support **DOES NOT** include other series such as customizing our products, installation and uninstallation service.

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.
