1. Order Management Installation Guide

Here we will guide you through the installation process of our extension. First off, open FileZilla, log in to your host as follows:

	合 🚅 😫 😫 🌸	1 🗉 🕺 😚 🕯	ñ							
Host: sftp://1	28.199. Username: root	Password:		Port:	Quickco	onnect -				
Status: Dire Status: Retr Command: cd ". Response: New	ng an eccory / usi/snare/ng ctory listing successful eving directory listing directory is: "/usr/share/n ctory listing successful									
Local site: //var/www/html/magento2/app/code/Magenest/Wrapper/ 🔹					Remote site: /usr/share/nginx/html/magento2/app/code					
	 Gode Magenest Booking GiftCard Hotel Extension Name Mageneto 				ļ		html 2 Magenest magento2	st		
Filename ^	Filesize Filetype	Last modified				Filename ^	Filesize	Filetype	Last modified Permission Ov	vner/Gro
 .git Block Controller Helper Model Observer 1 file and 9 dires 	Directory Directory Directory Directory Directory Directory Directory Ctories. Total size: 166 B	25/01/2016 21: 04/01/2016 15: 18/01/2016 22: 11/12/2015 16: 23/01/2016 15: 21/01/2016 10:				 .git Magenest Magento 		Directory Directory Directory	26/01/2016 drwxr-xr-x roc	otroot
Server/Local file	e Directio Remo	te file	Size	Priority Statu	JS					
Queued files	Failed transfers Succe	ssful transfers								
									Gueue:	empty 🔹 🖷

In the above example we switched the local site to the extension directory, and the remote site to the code directory. Now on the remote site window, inside app/code directory, create a folder named **Magenest** and go inside it. Now on your local site window, right click on **Extension Name** and click **Uploa**. The extension will be uploaded onto your host in a few minutes.

The second method will require you to compress the extension into .zip or .tar.gz format, then execute the following command in your Command Line /Terminal:

scp <path to your extension> <ssh server>:<path to Magenest directory>

Then log into your ssh server, go to Magenest directory and execute the following command to decompress the module:

unzip <.zip compressed extension>

Or

tar -xzvf <.tar.gz compressed extension>

Now go to your Magento root directory, say it's named magento2, and execute the following commands:

php bin/magento setup:upgrade

php bin/magento setup:static-content:deploy

After running all these, your Command line/Terminal window might look like this:

	Magento_BundleSampleData':
	Magento_Rss':
	Magento_DownloadableSampleData':
	Magento_Captcha':
	Magento_OfflineShippingSampleData':
	Magento_ConfigurableSampleData':
	Magento_SalesSampleData':
	Magento_ThemeSampleData':
	Magento_ProductLinksSampleData':
	Magento_ReviewSampleData':
	Magento_SendFriend':
	Magento_Ui':
	Magento_Sitemap':
	Magento_Authorizenet':
	Magento_Swagger':
	Magento_Swatches':
	Magento_SwatchesSampleData':
	Magento_CatalogRuleSampleData':
	Magento_TaxImportExport':
	Magento_TaxSampleData':
	Magento_CatalogRuleConfigurable':
	Magento_CmsSampleData':
	Magento_Translation':
	Magento_Shipping':
	Magento_Ups':
	Magento_UrlRewrite':
	Magento_GroupedProductSampleData':
	Magento_Usps':
	Magento_Variable':
	Magento_Version':
	Magento_Webapi':
	Magento_SalesRuleSampleData':
	Magento_CatalogWidget':
	Magento_WidgetSampleData':
	Magento_Wishlist':
	Magento_WishlistSampleData':
	e-run Magento compile command
	ntos-2gb-sgp1-01 magento2]# sudo chmod -R 777 var pub
[root@cer	ntos-2gb-sgp1-01 magento2]#

Finally, you need to flush the cache by either type this into the Command Line/Terminal:

php bin/magento cache:flush

Or go to System > Cache Management. Click the following buttons to completely clear the store cache:

Flush Magento Cache
 Flush Cache Storage
 Flush Catalog Images Cache
 Flush JavaScript/CSS Cache

Ŵ	Syster	n >	t		Flush Cache Storage	Magento Cache				
\$ SALES			2 reco	ecords found						
Ŷ	Cache Ma	inagement		Description	Tags	Status				
	Index Manageme	nagement		Various XML configurations that were collected across modules and merged.	CONFIG	DISABLED				
				Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	DISABLED				
<i></i>				Page blocks HTML.	BLOCK_HTML	DISABLED				
STORES				Collection data files.	COLLECTION_DATA	DISABLED				
SYSTEM				API interfaces reflection data.	REFLECTION	DISABLED				
				Results of DDL queries, such as describing tables or indexes.	DB_DDL	DISABLED				
				Entity types declaration cache.	EAV	DISABLED				
11				Integration configuration file.	INTEGRATION	DISABLED				
		Integrations API Config	uration	Integrations API configuration file.	INTEGRATION_API_CONFIG	DISABLED				
		Page Cache		Full page caching.	FPC	DISABLED				
		Translations		Translation files.	TRANSLATE	DISABLED				

Now you can go to your store and check if the extension is working as expected.
