## Introduction

Gift Card extension for WooCommerce allows merchants to easily create gift cards and sell them.

### Features for admin

- Create Gift cards product to sell online.
- Set unlimited values of gift card products to be shown as a drop down, fixed amount or a range.
- Configure the gift card module, change the pdf gift card setting.
- Full back-end control: create, edit, resend, change status of gift cards, and more.
- Import gift cards using csv files.
- Enable option to use gift card to buy gift card
- Enable options to apply gift cards for shipping fee, tax, and WooCommerce fee
- Create unlimited email templates. Assign them to each product and allow customers to select email templates for specific purposes
- Exclude Product from gift card discount. The gift card cannot be applied for the excluded product.
- Create multiple PDF template for multiple gift cards
- 4 default email templates for Birthday, Thanksgiving, Valentine's and Christmas.
- Design gift card PDF using drag and drop instead of classic coordinates
- Auto generate QR Code for gift cards
- Change gift card language
- Change gift card text's font, size
- Track gift card log

### Features for customers

- Customers can choose the value of gift card, gift card email template
- Customers can schedule to send gift cards
- After success purchase, gift card will be sent to the customer's friend via email
- Gift card receiver can use the gift card multiple times as long as the gift card balance is sufficient
- Customer can check the gift card balance in gift card's log in My account

## System Requirements

Your store should be running on **WooCommerce 3.0, 3.4.7; Wordpress 4.8., 4.9.8**

## Tutorial Video

---

# Main Functions

## 1. Configuration

Firstly, you have to configure for the module, including:

- Processing Gift Card
- Gift Card
- Default Email Setting

## Processing Gift Card Settings

- **Activate gift card and send notification email when status of order:** Gift card email is sent when status in this setting and in order are the same.

**Ex:** In settings: On hold / In orders: On hold. Then email will be sent to both buyer and recipient.

[blocked URL](#)

## Gift Card Settings

- **Default expire time span:** The default expiry time (days) for all gift cards. You can also set the expiry date for each gift card in its settings. If you leave this blank, the gift cards will never expire.
- **Gift card code patten:** The gift card code format. [A5] means to generate 5 random alphabetical characters, [N4 ] will generate 4 random numbers. "Magenest" is the hard code  
Example: Magenest-[A3][N2] will generate a code like Magenest-af123 or Magenest-af09 ...

**Note that we have 2 types of gift card code settings:**

- Gift card code with numeric and text patterns (i.e: Magenest123code456): When customers purchase in the brick and mortar, they will show this code to the merchant so he can fill it in the order for discount. If customers purchase online, they just have to apply this code on the checkout page.
- Gift card code as QR code: Customers show this QR code on the phone, merchant will use a mobile scanning app to scan the QR code. The gift card code will be displayed in numeric and text format, then merchant fill it in the order for discount.

1. While the numeric and text code can be used both online and offline, the QR code is used only for **offline purchase**. Customers will show this QR code (printed ticket or on mobile) to merchant. Merchant will use a mobile scanning app to scan this code.

2. When the QR code is scanned, the numeric code will be displayed on the screen, merchant will use this code, fill this code in the order for discount.

At the moment, we do not have the app that can automatically redeem the code in the back end when scanning. Merchant will have to do that manually by filling the code when creating the order for customers.

3. You can download the QR code scanning app on the mobile from Play store (for Android devices), or App store (for iOS devices).

## Default Email Settings

You can set the default email template in this setting. You can also add specific email template in each product setting. If the email template in product setting is empty, this default one will be used.

You can set to attach the PDF gift card to the email by ticking in the **Attach PDF gift card** box.

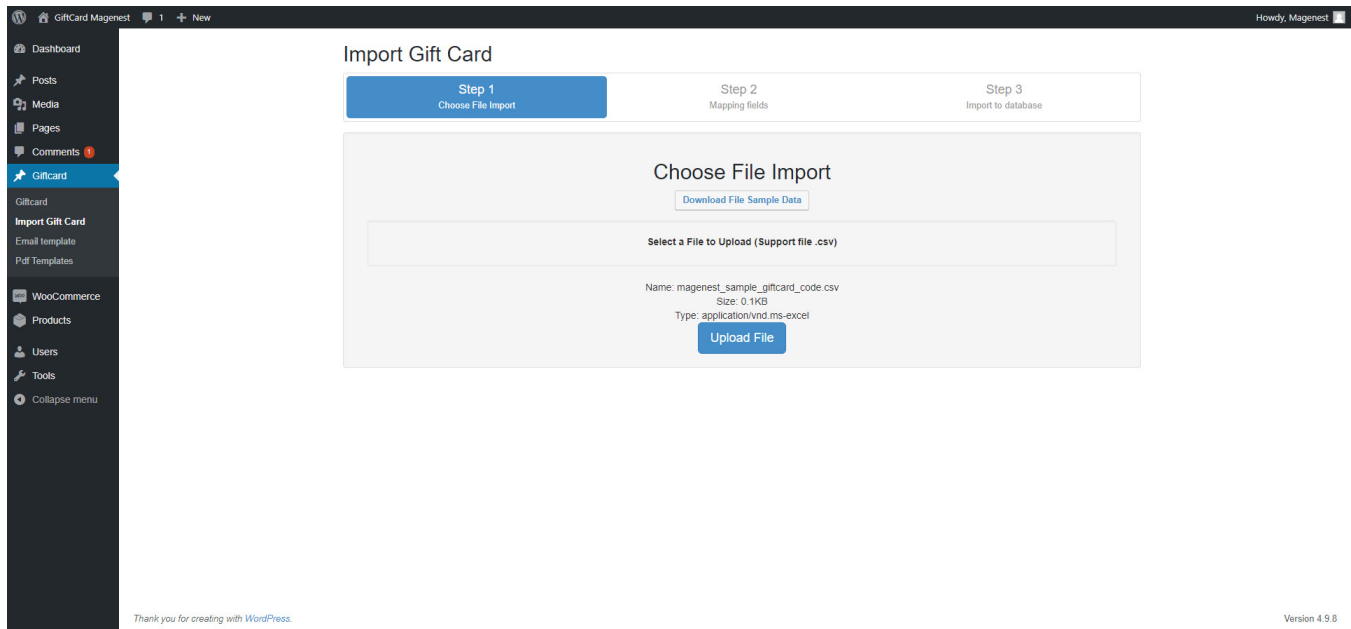

[blocked URL](#)

## 2. Import Gift Card Codes

On the left menu bar, go to **Gift Card > Import Gift Card**

First, in step 1, you must import the gift card csv file. You can download the sample file here [magenest\\_sample\\_giftcard\\_code.csv](#)

Click on **Select a File to Upload**, select the csv file in your folder. Then click on **Upload File** button.

In step 2, you must map the fields of the gift card info. Clicking in the file column, there will be a drop down list for each field. You should map the fields as follows

- Gift Card Code - Gift Card Code
- Balance - Balance
- Status - In stock

In the product configuration, you can assign the uploaded code to the gift card products. You can choose: the product to assign gift card codes, the email template, the pdf template, and add the name of the pdf file.

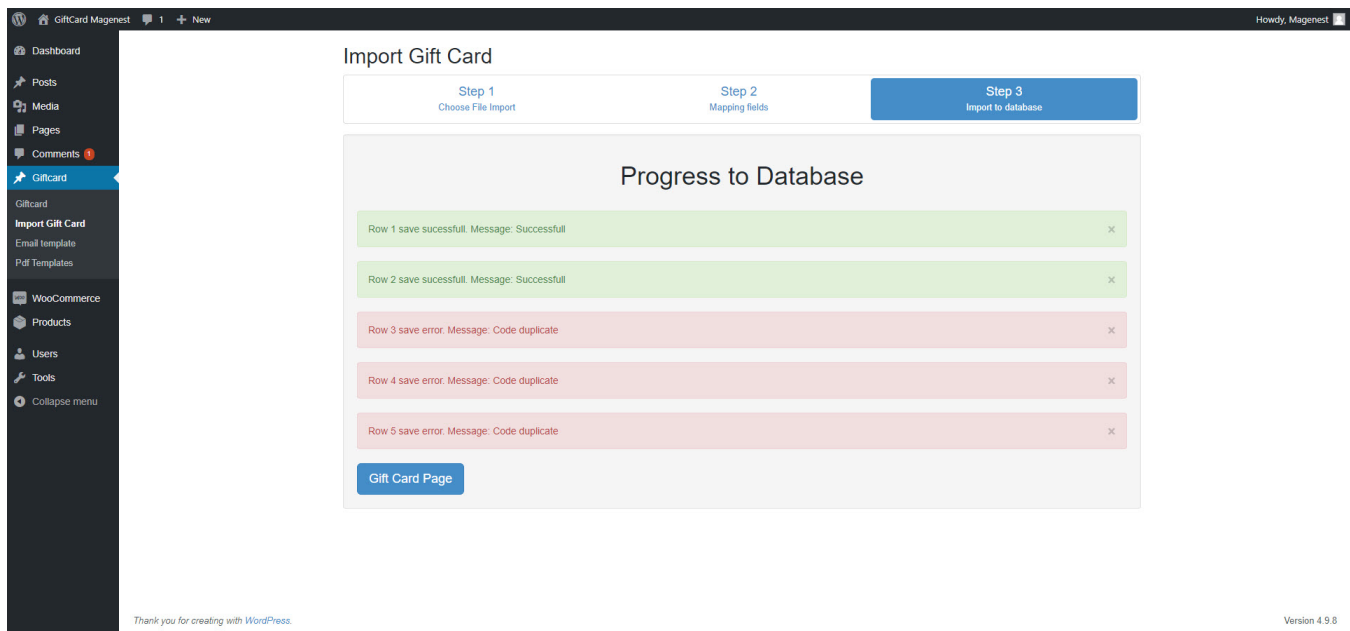

Then you can click on **Import to Database** button to import the gift card codes

In step 3, you can check the progress of the import process, you can see if there is a duplicate code.

Clicking on **Gift Card Page** button will direct you to Gift Card List page.

### 3. Gift Card Page/ Gift Card Report

In the backend, you can view all gift cards in the gift card page.

Title	Date	Balance	Gift Card Status	To email	Product
425Magenest	Published 2018/08/10	\$130	In Stock		Giftcard for birthday
Magenest1	Published 2018/08/07	\$12	Sent	keynt2704@gmail.com	Giftcard for birthday party
Magenest120	Published 35 mins ago	\$120	In Stock		Happy Birthday Mug
Magenest12023343	Published 2018/08/16	\$120	Sent	keynt2704@gmail.com	Giftcard for mother's day
Magenest130	Published 35 mins ago	\$130	In Stock		Happy Birthday Mug
Magenest130fgdfgfd	Published 2018/08/16	\$130	In Stock		Giftcard for mother's day
Magenest1321040	Published 2018/08/10	\$140	In Stock		Giftcard for birthday
Magenest140	Published 2018/08/10	\$140	Sent	hangnt@magenest.com	Giftcard for birthday party
Magenest140ghghg	Published 2018/08/16	\$140	Pending send	keynt2704@gmail.com	Giftcard for mother's day

Clicking on one gift card code, you can view the gift card details including the order ID, the gift card product name, the expiry date, the email sent info (to email, name of recipient, message, and the scheduled sending time).

You can also see the gift card usage history.

Version 4.9.8

**Gift Card Pro for WooCommerce** provides you with 4 default email templates: Birthday, Thanksgiving, Valentine's, and Christmas. You can add more as you want.

- You can design the email template using HTML & CSS
- You can use the following short codes to add content to the email template

{{from\_name}} - email sender/ gift card purchaser

{{to\_name}} - email receiver/gift card receiver

{{to\_email}} - email address of the gift card sender

{{message}} - the message customers want to send to their friend(s)

{{code}} - gift card code

{{balance}} - gift card balance

{{expire\_at}} - expiry date of the gift card

{{product\_image}} - product image

{{product\_name}} - product name

{{store\_url}} - store URL

{{store\_name}} - store name

Then, you can assign the email template to a particular product in the product setting

The screenshot shows the WordPress admin interface for a WooCommerce product. The 'Product data' tab is active, and the 'Simple product' type is selected. The 'Gift Card' checkbox is checked. The 'Email Template' dropdown menu is open, showing options: 'Happy Birthday 2', 'Happy Mother's Day' (highlighted), 'Happy Birthday', 'Gift shop email template', and 'Thank you email template'. The 'Happy Mother's Day' option is selected. The 'Email Template' field is highlighted with a red box.

## 5. Gift card PDF

Go to Gift Card > PDF Templates, you will see all the PDF templates. Click on Add PDF Template to create a new PDF gift card, or click on one in the list to edit.

## blocked URL

The screenshot displays the 'Edit PDF template' interface for 'GiftCard Magerest'. The main area shows a 'PDF View' of a birthday-themed gift card template. The template features a pink background with four colorful cupcakes (purple, pink, yellow, orange) and lit candles. Text fields are overlaid on the template, including 'From:', 'To:', 'Balance:', and 'Giftcard code:', each followed by a shortcode placeholder like {{from\_name}}. A QR code is also visible in the bottom right corner of the template. The right sidebar contains several settings sections: 'Publish' (Status: Published, Download PDF), 'PDF Config' (Page width: 623, Page height: 321, Background image for ticket), 'Text settings' (Add new, Text content, Color, Font, Size), 'ShortCode' (Sender, Friend Name, Friend Mail, Message send to friend, Gift Card code, Gift Card balance, Gift Card Expiry Date, Store URL), 'Image settings' (Add new), 'Qrcode' (Add new Selection), and 'Featured Image' (Set featured image). The bottom of the interface shows a footer with 'Thank you for creating with WordPress' and 'Version 4.9.8'.

In the PDF setting, on the right column, there are 5 settings: PDF Configuration, Text settings, Shortcodes, Image settings, and QR Code setting

- PDF Settings: You can set the page width and height (in px), upload or delete the background image for the gift card
- Text settings: To add text on the pdf design, you click on Add new, then fill in the text content, choose the text color, font, size.
- Shortcodes: You can use the shortcodes provided here for the PDF content
- Image setting: Upload image to the PDF design
- QR Code: To add QR code

## 6. Create a new gift card product

To create a Gift card product, an admin need to navigate to **Product > Add new**.

## Update

- When a bug fix or new feature is released, we will provide you with the module's new package.
- All you need to do is repeating the above installing steps and uploading the package onto your store. The code will automatically override.

- Flush the configure cache. Your store and newly installed module should be working as expected.
- 

## Support

- We will reply to support requests within **2 business days**.
  - We will offer **lifetime free update and 6 months free support for all of our paid products**. Support includes answering questions related to our products, bug/error fixing to make sure our products fit well in your site exactly like our demo.
  - Support **DOES NOT** include other services such as customizing our products, installation and uninstallation service.
- 

Once again, thank you for purchasing our extension. If you have any questions relating to this extension, please do not hesitate to contact us for support.

**Magenest**
