Introduction

Enjoy a seamless payment process and advanced security with Magento 2 Stripe Payment.

Features For Admin

A lot of features are included in the extension that you can tweak to make it best suit your business, including:

- SCA is available on Stripe Checkout and Stripe Payment Intents
- SEPA Direct Debit
- Choose between Authorize Only or Authorize and Capture.
- IFrame Checkout Form.
- Alipay, Giropay, Apple Pay, Google Pay,
- 3D Secure
- Support Stripe.js v3 with Stripe Elements for PCI DSS Compliance
- Restrict unwanted countries from payment
- Support Save Card function
- Various credit card types
- Support CVC/AVS Verification
- Access to more than 25 countries
- Easily partial capture invoice.
- Conveniently partial or total refund
- Support 135 currencies
- Support MOTO (Making payment from backend)
- Support Giropay, Alipay, SOFORT, Bancontact, EPS, etc.
- Update Stripe Intents 2.0 (New)

Features For Customer

- Easily checkout using credit cards.
- Flexible payment choices
- Save credit card info for the next purchase

System Requirements

Your store must run on Magento 2 version **2.2.x; 2.3.x; 2.4**

Configuration

Setup Stripe Account

You need to have a Stripe merchant account to connect the extension. If you are yet a Stripe merchant, you can create a new account by clicking on the following link: <https://dashboard.stripe.com/register>

Then, choose **Create your Stripe account** to set up a new account

A screenshot of the Stripe account creation page. The page has a light gray background. At the top center is the Stripe logo. Below it is a white box with a blue border containing the text "Create your Stripe account." followed by a link "...or save your account later, and skip this step". Below this are three input fields labeled "Email", "Password", and "Confirm password". At the bottom of the box is a blue button with the text "Create your Stripe account". Below the box, there is a link "Already have an account? Sign in." and at the very bottom, a footer with links: "Forgot your password?", "Privacy Policy", "Contact", and "© Stripe".

Once you have the Stripe account, sign in on Stripe.

After that, click on **API** at the left corner > **API Keys** to get the API Keys.

Set Configuration

At the back end, you need to configure some fields to connect between your Magento site and the Stripe account.

On the Admin sidebar, tap **STRIPE**, then choose **Settings**.

+ Sandbox Mode Enabled: Turn this on (Yes) for test mode, remember to use test key and test cards for testing. Other please turn this off (No) when you go Live.

+ Publishable Key and Secret Key

- **If you use the Test Key:**
 - You should fill in Stripe API Test Keys in **Test Publishable Key, Test Secret Key** to connect Magento and Stripe Payment Gateway.
 - Turn on the **Sandbox Mode Enabled** by choosing Yes.
- **If you use the Live Key:**
 - Fill in your Stripe API Keys in **Live Publishable Key, Live Secret Key** to connect Magento with Stripe Payment Gateway.
 - Turn off the **Sandbox Mode Enabled** by choosing No.

+ Webhooks config: You can configure Stripe webhooks by going to Use webhooks to receive events from your account.

Login your Stripe account, then in the Webhooks configuration, click on **Add endpoint** button.

The URL to be called follows the format: **{your magento url}/stripe/checkout/webhooks**

Select the filter event as **Send all event types**

Add a webhook endpoint

Copy the signing secret and paste to Magento 2 Configuration

- **Webhooks signing secret:** Enter the signing secret from Stripe+.
- **Email Customer:** Allow Stripe to send receipts to customers once the payment is made successfully.
- **Statement descriptor:** An arbitrary string to be displayed on your customer's statement. As an example, if your website is RunClub and the item you're charging for is a race ticket, you may want to specify a statement_descriptor of RunClub 5K race ticket. While many payment types will display this information, some may not display it at all.

- **Enable:** Choose **Yes** to enable Paya Form Gateways
- **Title:** The title of the payment method displayed on the checkout page
- **Payment Action :**
 - **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.
 - **Authorize And Capture:** charge the debit/credit card at the time of the order is placed.
- **Delete Account Vault Paya When Deleting A Card:** Select yes to delete Account Vault Paya when deleting the card.
- **Payment from Applicable Countries :**
 - **All Allowed Countries:** Enable all allowed countries to make payment.
 - **Specific Countries:** Restrict some countries by unselecting them from the Payment from Specific Countries.
- **Enable card saving:** Allow customers to save credit cards for future purchases. Customers' credit card info will be tokenized for security purposes.
- **New Order Status:** Set order status for orders.
- **Sort Order:** The order of the payment method that will be displayed on the checkout page.
- **Display credit card types:** Show image card type in checkout

Stripe Checkout Hosted on Stripe (SCA Ready)

- + **Enable:** Choose **Yes** to active **Stripe Checkout Hosted on Stripe** on the storefront.
- + **Title:** enter the title for the payment method on the payment list on the checkout page.
- + **Payment Action:** select the between two options:
 - **Authorize Only (Authorization):** the system will check the card for validity but not charge the account yet until the order is approved and invoiced.
 - **Authorize and Capture:** the system will charge the debit/credit card at the time of the order submission.

+ Collect Billing Address: if choose **Yes**, the system will collect the address information on the Shipping Address page and not require the customer to enter their address after choosing the payment method.

+ New Order Status: set the status for the new order on the order page at the backend.

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

Stripe Checkout Hosted on Stripe (SCA Ready)

You should add `checkout.session.completed` to webhooks events to receive webhooks

Stripe Checkout includes support for:

- Credit and debit cards payment
- Apple Pay (with no additional setup required)
- Dynamic 3D Secure 2

Enabled [store view]	Yes
Title [store view]	Stripe Checkout
Payment Action [store view]	Authorize and Capture

Stripe Payment

- + **Enabled:** Choose Yes to enable the Stripe payment method.
- + **Title:** the title of the payment method displayed on the Checkout Page.
- + You can set the **Payment Action** to be Authorize and Capture or Authorize Only
 - **Authorize Only (Authorization):** will check the card for validity but not charge the account yet until the order is approved and invoiced.
 - **Authorize and Capture(Sale):** will charge the debit/credit card at the time of the order submission.
- + **Select Stripe API Integration:** There are 3 Stripe API to choose
 1. **Stripe.js v3 & Elements.** Pre-filled SAQ A
 2. **Stripe.js v2.** SAQ A-EP

3. Directly to the API. SAQ D

It is highly recommended to use **Stripe.js v3 & Elements** for advanced security features.

Note: In order to enable 3D secure, you must use **Stripe.js v3 & Elements** or **Stripe.js v2**.

+ **Display payment button:** Enable this option to display Apple Pay, Google Pay, and Microsoft Pay payment button in Stripe payment method

+ **3D Secure:** Choose Yes to enable 3D secure for Stripe payments

The behavior and application of 3D secure varies across card types and networks. Some card issuers does not support this verification method, in order to deal with that, you can choose 1 of 2 options for 3D secure application:

- **3D secure is recommended:** The process is not required, but you can be covered by liability shift.
- **3D secure is optional:** The process isn't required but can be performed to help reduce the likelihood of fraud.

+ **Force 3D secure:** Choose Yes to force 3D secure application.

+ **Enable card saving:** Allow logged in customers to save credit card information.

+ **Enable MOTO:** Allow admin to make payment from backend.

+ You can set the **New Order Status:** Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

+ **Allowed Credit Card Types:** You can choose which credit card types are accepted on your site by choosing one or more items.

+ **Payment from Applicable Countries:**

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

+ In addition, you can add/edit the **Instructions** to instruct customers how to do payment.

+ **Sort Order:** The order of the payment method that will be displayed on the checkout page.

Stripe IFrame Checkout Form

+ **Enabled:** Choose Yes to enable the IFrame checkout form method

+ **Title:** Edit the title for the payment method. Here we recommend you to set it as "Stripe Checkout IFrame"

⏪ Stripe IFrame Checkout Form

Stripe payment method uses checkout.js

Enabled [website]	Yes
Title [store view]	Stripe IFrame Checkout Form
Payment Action [website]	Authorize and Capture
	Authorization expires in 7 days

Allow Stripe Checkout to collect customer's zip code [website]	Yes
Enable Remember Me [website]	No
	Allow customer to save their information for quicker access in the future
Logo Image [store view]	<button>Choose File</button> No file chosen
Locale [website]	Auto
Sort Order [store view]	10
Payment from Applicable Countries [website]	All Allowed Countries
Payment from Specific Countries [website]	Afghanistan Åland Islands Albania Algeria American Samoa Andorra Angola Anguilla Antarctica Antigua and Barbuda
Minimum Order Total [store view]	
Maximum Order Total [store view]	

+ You can set the **Payment Action** to be Authorize and Capture or Authorize Only

- **Authorize Only (Authorization):** will check the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture(Sale):** will charge the debit/credit card at the time of the order submission.

+ You can set the **New Order Status**: Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

+ **3D secure:** The 3D secure settings for this method will follow the 3D secure settings in Stripe Payment Settings. Note that you don't have to enable Stripe Payment Settings to make it work, just change the 3D secure settings then Save Config.

+ **Name of website displayed on Checkout:** Your store name.

+ **Panel Label:** The label of the payment button in the Checkout form

+ You can turn on **Allow Stripe Checkout to collect customer's billing address, shipping address and zip code**

+ **Remember Me:** If you set this option to **Yes**, Stripe will save the customer's information for later purchase in every website that use Stripe Payment Gateway.

+ **Logo image:** The logo image that will be displayed on the Iframe form.

+ **Sort Order:** The order of the payment method that will be displayed on the checkout page.

+ **Payment from Applicable Countries:**

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

Apple Pay, Google Pay, Microsoft Pay

+ **Register Apple Pay:** Enter your domain here to verify for Apple Pay.

+ **Enabled:** Choose Yes to enable Apple Pay, Google Pay, Microsoft Pay

+ **Title:** Fill in the title for the payment method

+ You can set the **Payment Action** to be Authorize and Capture or Authorize Only

- **Authorize Only (Authorization):** will check the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture(Sale):** will charge the debit/credit card at the time of the order submission.

+ You can set the **New Order Status:** Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

+ **Replace default Place order button:** Enable to replace the default Place Order button with Apple Pay, Google Pay or Microsoft Pay Place Order button. **Note** that this option can cause conflict with One step Checkout extension, so if currently you are using One Step Checkout, turn this option off.

🔙 Apple Pay, Google Pay, Microsoft Pay

1. Stripe payment button only work with HTTPS domains

Place Order

+ Checkout with Apple Pay/Google Pay

⚠ To use **Google Pay** (for PC), customers have to add their credit card to the browser.

In case your browser can't pay button to transfer, follow this guide to display Stripe Payment request button.

The screenshot shows a checkout page with a progress bar at the top indicating 'Shipping' and 'Review & Payments' steps. The 'Payment' section is active, showing various payment methods: 'Check / Money order', 'Apple Pay/Google Pay' (highlighted with a red box), 'GiroPay', 'Alipay', 'Stripe Checkout', and 'Stripe Checkout iframe'. The 'Apple Pay/Google Pay' section includes a checkbox 'My billing and shipping address are the same' which is checked, and a form with the following details: Susan Smith, 67 Main Street, New York, New York 10001, United States, 1243325. A red arrow points to a 'Pay now' button. To the right, a 'Your payment' modal is open, showing an 'Order summary' with a total of EUR €50.00, a 'Payment' method of Visa ****4242 Susan Smith, and a 'Pay' button. Below the modal, a '1 Item in Cart' section shows a 'MINI SKIRT' for €50.00. The 'Ship To' section displays the same address as the billing address. The 'Shipping Method' section is also visible.

Mark the checkbox **"My billing and shipping addresses are the same"** if the shipping address and the billing address are not different.

If they are different, fill in the billing address then click "Update".

After filling in all the necessary information, click **Pay now** to place the order.

If the customer signs in with an account, he/she can use the save card function by ticking in the **Save your credit card** box.

After filling in all the necessary information, click **Place Order** to finalize the payment.

+ Checkout with Stripe IFrame Checkout (Redirect Checkout)

Another payment method is Stripe Checkout IFrame. It supports wonderful functions with Credit Card, Alipay, and **Bitcoin**.

The screenshot shows a checkout page with a progress bar at the top indicating 'Shipping' and 'Review & Payments' steps. The 'Payment' section lists several options: Stripe Payment, GiroPay, Alipay, Stripe Checkout, and Stripe Checkout IFrame (which is highlighted with a red box). Below these options, there is a checkbox for 'My billing and shipping address are the same' and a form for the shipping address: Susan Smith, 67 Main Street, New York, New York 10001, United States, 123456. A 'Continue' button is located at the bottom right of the payment section. To the right of the payment section is an 'Order Summary' box showing a subtotal of €500.00, shipping of €5.00, and an order total of €505.00. Below the order summary is a section for '1 Item in Cart' showing a 'RUFFLE SLEEVE COLD SHOULDER DRESS IN LILAC LACE' for €500.00. At the bottom right, there are sections for 'Ship To:' and 'Shipping Method:' with a 'Flat Rate - Fixed' option.

When customer Place order, an IFrame form will be displayed as below with 3 choices for payment methods.

The screenshot shows a credit card IFrame checkout form. At the top, there is a circular profile picture of a person with pink flowers and the text 'Demo Site'. Below this, there are three tabs: 'Card', 'Alipay', and 'Bitcoin'. The 'Card' tab is selected. The form contains several input fields: 'Email' (with an envelope icon), 'Card number' (with a card icon), 'MM / YY' (with a calendar icon), and 'CVC' (with a lock icon). There is also a 'Remember me' checkbox. At the bottom, there is a large blue button labeled 'Pay €55.00'.

+ Making payment from backend (MOTO)

Customers do not always purchase online, sometimes they can order via telephone calls or emails. In these cases, it is essential that you - admin can make payments from backend on behalf of customers.

Using PCS DSS and Stripe v3.2 security standards, you can use customers's saved cards to make payment from backend for them. In this way, customer's credit card info will be secured, rather than admin types credit card info.
