Introduction

Store Locator for Magento 2 helps merchants guide online customers to physical stores easily via Google Maps integration. In this way, customers are allowed to find the right direction to the nearest store with multiple options (distance, payment methods, parking availability, etc.)

Highlight Features

For admin

- Set locations by directly clicking on the Map in the setting.
- Manually specify locations using Latitude/Longitude and apply them to the Map.
- Set the default zoom level on the map.
- Enable/disable the store(s).
- Set to display stores list tab on menu bar.
- Add description images for the stores.
- Set opening and closing time for all or each store by each day of the week.
- Set day-off for the stores.
- Set available products for store in store setting.
- Set stores list for each product in product configuration.
- Set color for the stores list on the front-end.
- Add special dates for a store with promotion information.
- Configure the SEO for each store.
- Add new attribute to a store: parking, ATM, new arrivals, payment methods, brands.
- Create holidays and brands, assign them to the stores.
- Import / Export the stores list.

For customers

- Customers can search for a store by location or filters.
- Auto zoom to show all locations in the region.
- Advanced direction from customer's spot to the store.
- Distance can be shown by radius (Km or Miles).
- Show store list in product detail pages.
- User friendly interface.
- Display image slider on store detail page.
- Show pin point on the map when clicking on the store name in the store list.
- Store pin point will show store info when clicked.

- shows the distance from your location (or by the entered address) to the stores
- Add the stores to favorites
- Filter stores by attributes, country, distance

System Requirements

Your store should be running on **Magento 2.3.x and 2.4.x**

General Configuration

On the admin sidebar, go to **Magenest Map List > Settings > Configuration**.

On the **Configuration** page

+ General

- **Show "Store" in Menu:** Choose **Yes** to display **Store** tab on the main menu bar.
- **Display a list of stores having the products in the Product Detail page:** choose **Yes** to show a list of stores on the product detail page. In the list, online customers can view the store that the product is available.
- **Background Color:** set the background for the store list section on the front-end.

+ Display

- **Allow display store logo:** Allow display store logo on frontend
- **Marker icon:** Set icon for store on the Map
- **Marker icon highlight:** Set icon when click to store on the Map
- **Display CMS block on store details page:** allow display the store CMS on the store detail page

Note: To edit CMS block, please go to **Content > Block** and select Covid-19 block

+ Map configuration

- **Google Maps API:** Enter your Google API.
- **⚠ Note:** Google has the API limit, learn more [here](#).
- **Unit System:** The radius unit - kilometers or miles.
- **Default Zoom:** Select the default zoom level.

Map config

Google Maps API
[store view]

You can get google API at -> [Get Google Maps API here](#)
Google Maps JavaScript API, Google Maps Geocoding API, Google Maps Directions API, Google Places API Web Service, Google Static Maps API
Must be enabled.

Add New Store

On the admin sidebar, go to **Magenest Map List > Stores > All Stores**. On the **Stores** page, admin can manage the available stores or add a new one. To add a new store, click on **Add New Store**, go to **New Store** page.

Store Settings

- **Status:** Enable/Disable the new store.
- **Store Name:** Enter a name for the new store.
- **Short Description:** Fill with a short description, which will be shown after customers click on the pin point on the map.
- **Description:** Enter a detailed description on the store-view page.
- Enter the store address on **State/Province, City, Zip, Address** fields.
- Add further information for the store on **Website, Email, Phone Number** fields.
- **Map:** Use Ctrl + scroll and mark the store address on the map, then the **Latitude** and **Longitude** fields will be auto filled.
- **Store Icon:** Upload store icon to identify the store on stores list.
- **Assign to Store Views:** Select store views to show the store information.

Tutorial Menu

★ After finish all the above configuration, please click **Save** button.

Add stores in product settings

When **creating or editing** a product, admin can assign the product to some stores on the product configuration page.

Catalog > Products > Add or Edit product

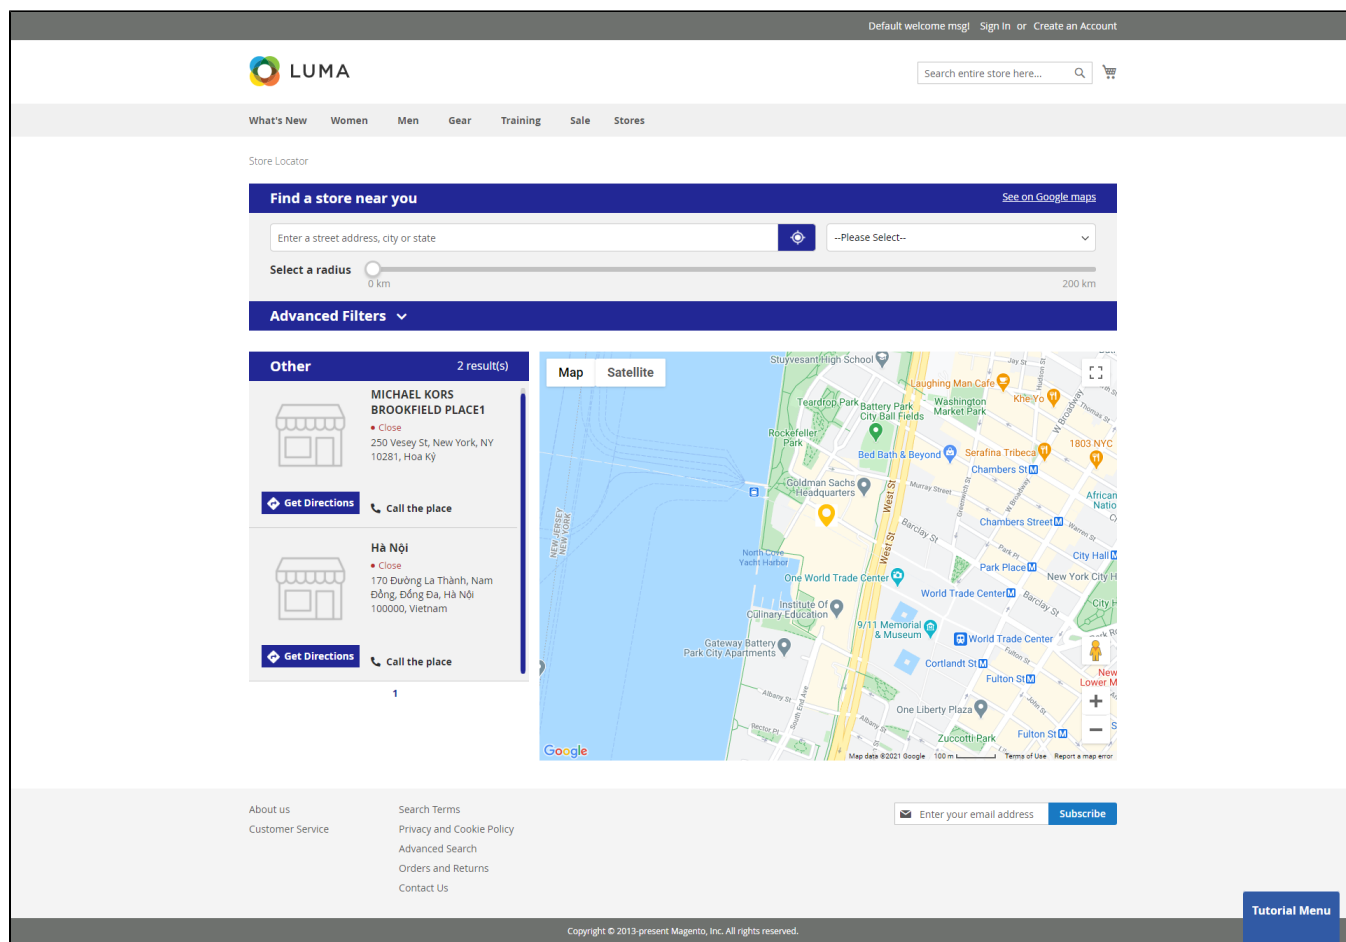

Store-front Functions

Find a store

- Click on the **Stores** tab on the main menu.
- On the store page, enter the address you want, drag the "**Select a radius**" slider to select the radius you want to filter, then select the attribute options. A list of the expected stores will be displayed below the search box.

⚠ **Note:** You can filter store with one or more attributes

- The color of stores list section can be changes by admin.
- You can add store to favorite by click to Add to favorite button or click to Added to favorite button to remove from favorites list.
- Click to **Call** the place button to call that store

+ Quick view of the store on the map

To have a quick view to a store on the list, after logging in, customer can click on the store name, then the quick-view section will display above the pin point. They can view the store **name**, **address**, **status**.

On the quick-view section, you can **call the store** or **add this store to your favorite list**.
